AUTOVPN SERVICE

Securely connect remote locations and headquarters

Acumera's site-to-site AutoVPN service provides a secure, reliable VPN tunnel between your corporate office and distributed locations. A single configuration is maintained and serves each site the appropriate settings.

With our AutoVPN service, you get:

- Automatic creation of complex site-to-site VPNs for a large number of store endpoints initiating connections to Acumera Edge Security Devices that act as dedicated responders

- Global configuration to eliminate manual site-by-site setup and reduce the time to identify a connection issue

- Secure site configuration management and monitoring through a single screen in the AcuVigil dashboard

- Connections that automatically build and rebuild to maximize uptime

- Reliable, secure connection at both ends of the tunnel to protect sensitive data

For even greater protection of your network, add Acumera's **external vulnerability scanning service** that will help you prevent cyberattacks and unauthorized network access.

Securely connect your sites: acumera.net, 512.687.7410 or sales@acumera.net
