

ENHANCED SECURITY SERVICES ENTERPRISE

THREAT MONITORING AND RESPONSE | LOG RETENTION | ALERTS AND REPORTS

Protect your company network, your revenue and your brand. Enhanced Security Services Enterprise (ESS Enterprise) manages, logs, detects and responds to threats to your business and home office servers, desktops, laptops and other endpoints all day, every day.

With Acumera's ESS Enterprise, you get:

- Global traffic threat monitoring and analysis of traffic anomalies and indicators of compromise (IoC)
- Capturing and storage of firewall logs with one-year retention in support of compliance and security requirements
- Alerts on network traffic anomalies and IoCs, managed through the AcuVigil™ dashboard
- Customized monitoring and reporting, as determined with your dedicated security expert
- Automated and manual response processes for threats, including incident triage, reporting, analysis and closure
- Internal and external vulnerability scanning that meets compliance and security requirements, including PCI DSS
- Web filter with category filtering, blacklists, whitelists and bypass keys
- Intrusion detection system (IDS) for monitoring malicious activity or policy violations
- Endpoint detection and response to record system-level behaviors, detect suspicious activity, and provide remediation suggestions to restore affected systems
- Syslogging to collect endpoint device logs for monitoring, auditing and review

Helps your IT team

Hand off processes to a team that specializes in securing networks and security monitoring

Safeguards against breaches

Protect your company from breach-related recovery costs of hundreds of dollars per compromised customer record

Keeps your business running

Reduce downtime, save thousands of dollars per hour of lost productivity, and reduce reputation risk

Protects employee and customer data

Monitor for data patterns and data exfiltration and ensure privacy compliance (PII, PHI, HIPAA, etc.) with Acumera's security services

Order ESS Enterprise at 512.687.7410.

Enhanced Security Services Enterprise Features

Threat Monitoring

Global traffic threat monitoring and analysis of traffic anomalies and indicators of compromise (IoC)

Log Retention

Capturing and storage of firewall logs with one-year retention and immediate access to recent logs in support of compliance and security requirements, including PCI DSS

Alerting

Alerts on traffic anomalies and indicators of compromise (IoC), managed through the AcuVigil™ Dashboard

Reporting and Security Planning

Customized monitoring and reporting, as determined with your dedicated security expert

Threat Response

Automated and manual response processes for identified threats, including incident triage, reporting, analysis and closure

Intrusion Detection System

Intrusion detection by traffic anomaly and behavioral analyses, plus deep packet inspection utilizing threat intelligence from numerous sources that supports compliance and security requirements

Internal and External Vulnerability Scanning

Automated scanning services that meet compliance requirements (like PCI DSS) and are accessible in the AcuVigil Dashboard

Web Filtering Service

Filtering to block viruses and malware via DNS that includes blacklisting, whitelisting, content blocking and SafeSearch features

WAN Failover Enabled

Automatic network failover capability to minimize disruptions to payment and cloud services when your primary internet goes down (cellular router and cellular service not included)

AutoVPN

Secure connection of home offices(s) to distributed locations for access to critical business information

Standalone Policy Management

Management of security policies on a per device basis for maximum flexibility, security and access control

Client Isolation

Network connectivity that is restricted not only between clients and servers, but also laterally between endpoints

Endpoint Detection and Response

Logging agent to record endpoint-level behaviors, detect suspicious activity and provide remediation suggestions to restore affected systems

Endpoint Logging and Syslogging

Device log collection with one-year retention for monitoring, auditing and review
