

Acumera NES™ Service for Healthcare

NETWORK EDGE SECURITY DESIGNED FOR HEALTHCARE

Acumera removes the complexity of network management and increases network security and uptime to keep your healthcare organization running smoothly.

Network Security & Compliance

Safeguard sensitive data, protect against breaches and simplify compliance.

Protect payment systems plus segment and secure entire networks with Acumera's advanced firewall.

Get log monitoring and network security services to protect against cyber attacks and downtime.

Network Connectivity

Keep your networks running smoothly and payments flowing.

Connect and secure critical systems and all network-connected devices.

Gain secure, remote access for compliant connections to payment, DVR and other devices.

Network Support

Gain visibility and proactive network monitoring to quickly identify and resolve issues.

Rely on Acumera's US-based team of network support experts 24x7x365 for fast problem resolution and maximum uptime.

Get alerts and issue resolution before network issues can hurt your healthcare organization.

Network Monitoring & Analytics

Save money due to lost inventory and maximize efficiencies with automated reporting and historical data.

Access a cloud-based dashboard and containerized edge computing workloads (also known as apps) for analytics, loyalty programs, and more.

Get secure data extraction for third-party loyalty and analytics providers.

To protect your healthcare organization with
Acumera NES Service, call 512.687.7410.

Acumera NES™ Service for Healthcare protects your organization with:

Security & Compliance	Advanced firewall to secure and segment networks, safeguard sensitive personal data and Protected Health Information (PHI), and shield Internet of Things (IoT) devices
	Log monitoring and network security services for monitoring up to 50,000 network traffic logs per site per day
	Compliance guidance and tools (HACCP, PCI, PII and others) from a provider listed on the Visa and Mastercard registries of PCI compliant service providers
Support	24x7x365, US-based network support for fast problem resolution and maximum uptime
	AcuVigil™ management dashboard for visibility and proactive network monitoring to quickly identify issues and alert you before they can disrupt your organization
	Easy-to-use help-ticket system with automated alerts, visibility and central problem identification and resolution
Connectivity	AcuLink™ Remote Access Service for secure, compliant connections to payment, DVR and other devices
	Secure, segmented network to safeguard all connected devices, protect sensitive data and maximize uptime
	Cellular backup (WAN failover) capability for automatic backup network connectivity to prevent payment processing disruptions when your primary internet goes down (cellular service not included)
Monitoring & Analytics	Secure, containerized edge computing workloads integrated into the Acumera Edge Security Device for monitoring, management, business intelligence and more
	Cloud-based dashboard to support Internet of Things (IoT) devices, loyalty programs, business management software and more
	Secure data extraction for third-party loyalty, analytics and back-office providers

Other services available include: cellular service for WAN failover, internal vulnerability scanning, external vulnerability scanning, network traffic monitoring and log storage, intrusion detection system (IDS), monitoring and response, and web content filtering.
