

SECURE WiFi SERVICE

Separate multiple private and public networks

Acumera's secure, segmented WiFi service is configured by our Network Operations Center (NOC) to meet your wireless network requirements.

With our WiFi service, you get:

- Segmentation and isolation of WiFi to protect your network
- A branded splash page with a customer agreement
- 24x7x365, US-based, proactive monitoring and troubleshooting support
- Up to four separate WiFi networks per access point
- High-speed connections to support voice and video
- Cloud-configured plug-and-play device installation
- Traffic prioritization and open, tokenized or password accessibility
- Scheduling of service availability, and optionally by user
- Setup and support by a security expert
- A limited lifetime hardware warranty

Combine secure, segmented WiFi with one of **Acumera's managed network services** to get a complete network security solution.
