

VERIFONE COMMANDER POS BACKUP SERVICE

DAILY BACKUPS | FILE RETENTION AND DOWNLOADS | CLOUD-BASED STORAGE

The Verifone Commander POS backup service, managed through the AcuVigil™ dashboard, backs up the Verifone Commander POS configuration files to a cloud-based storage location.

With the Verifone Commander POS backup service, you get:

- Daily backup of POS configuration files
- Backup retention for 180 days with the most current file stored indefinitely
- Notification of configuration file changes
- Downloadable backup configuration files
- Accessibility by in-house and third-party service company VASCs through the AcuVigil dashboard
- Compliance with Verifone SMS Import Export utility standards to successfully get the POS back online
- Ability for junior technicians to perform an onsite Commander reload while senior techs restore the data remotely (when combined with AcuLink™)

Reduce store downtime by 3 to 5 hours during a Verifone Commander reload.

Protect sales and brand reputation.

Prevent configuration drift.

Always have an up-to-date POS backup.

Easily identify and correct misconfigurations.
