

Restaurant Connections

Removes the complexity of network management, increases network security and maximizes uptime to keep payments flowing.

With Restaurant Connections, Acumera provides you:

Security & Compliance

Safeguard sensitive data, protect against breaches and simplify PCI compliance.

Protect POS systems and segment and secure entire networks with Acumera's advanced firewall.

Get an additional layer of network protection with external vulnerability scanning.

Connectivity

Keep your networks running smoothly and payments flowing.

Connect and secure critical payment systems and all network-connected devices.

Gain visibility of all network devices in a single dashboard view.

Support

Gain proactive network monitoring to quickly identify and resolve issues.

Rely on Acumera's US-based team of network support experts 24x7x365 for fast problem resolution and maximum uptime.

Get alerts and issue resolution before network issues can hurt your business.

Monitoring & Analytics

Save money due to lost inventory and maximize efficiencies with automated reporting and historical data.

Access a cloud-based dashboard and containerized edge computing workloads (also known as apps) for analytics, loyalty programs, and more.

Get secure data extraction for third-party loyalty and analytics providers.

Order Restaurant Connections at 512.687.7410.

With Restaurant Connections, you get:

Security & Compliance	Advanced firewall to secure and segment networks, safeguard sensitive POS system data, and shield DVRs and other Internet of Things (IoT) devices
	External vulnerability scanning from a PCI certified approved scanning vendor (ASV) and automatic quarterly scans with stored results for future PCI audits
	Log monitoring and network security services for monitoring up to 50,000 network traffic logs per site per day
	PCI guidance and tools from a Level 1 PCI certified service provider that is listed on the Visa and Mastercard global registries of PCI compliant service providers
Support	24x7x365, US-based network support for fast problem resolution and maximum uptime
	Proactive network monitoring to quickly identify issues and alert you before they can disrupt your business
	Easy-to-use help-ticket system with automated alerts, visibility and central problem identification and resolution
Connectivity	AcuVigil™ dashboard for visibility of network devices in a single dashboard to quickly identify issues and keep your sites operating and payments processing
	Secure, segmented network to safeguard all connected devices, protect sensitive data and maximize uptime
	WAN failover (cellular backup) capability for automatic backup network connectivity to prevent payment processing disruptions when your primary internet goes down (cellular service not included)
Monitoring & Analytics	Temperature monitoring and historical data to protect inventory, maximize efficiencies and manage HACCP logs and daily reports
	Cloud-based dashboard and edge computing workloads to support Internet of Things (IoT) devices, loyalty programs, business management software and more
	Secure data extraction for third-party loyalty, analytics and back-office providers

Other services available include: secure WiFi, door monitoring, cellular service for WAN failover, internal vulnerability scanning, network traffic monitoring and log storage, intrusion detection system (IDS), monitoring and response, and web content filtering.
