

As cyberattacks and losses have increased, so has demand for cyber insurance. Thrive helps businesses navigate the complex and “muddy” cyber security insurance landscape.

Cyber security insurance is growing in popularity as a way to transfer the risk of losses associated with a data breach and new requirements. However, cyber security insurance policies can be confusing to figure out what’s covered and what’s not.

That’s why businesses are turning to Thrive to help them decipher which provider, policy and protection are best.

Demand for Cyber Security Insurance

The demand to purchase cyber security insurance is largely driven by the growing number of ransomware attacks happening to businesses or vendors within their supply chain. New cyber security requirements are also fueling the uptick in policies.

- ♦ The average cost of a ransomware attack is **\$142,000**
- ♦ **60%** of companies victimized by ransomware experienced revenue loss
- ♦ It’s estimated that a ransomware attack occurs every **11** seconds
- ♦ The average downtime a company experiences after a ransomware attack is **21 days**

Rising Premiums

Premiums are going up 20-30% due to an increase in cyber attacks and the changing cyber insurance needs to combat them. Many organizations struggle to manage the cost of the increased premiums, but cyber insurance still plays a necessary role in any mature organization’s cybersecurity and risk mitigation strategy.

Policy Agents Aren’t IT Experts

Organizations that implement cyber insurance are better armed to guard themselves against an expanding cyber threat environment. However, when considering a cyber security insurance policy, businesses may deal with insurance agents who are not versed in security or event IT.

Cyber Security Insurance Gaps & Thrive Solutions

Gap	Thrive Solution
Multi-Factor Authentication (MFA)	
Endpoint Protection & Response (EDR)	
Phishing Exercise/Cyber Awareness Training	
Patch Management	
Secure RDP/VPN	

Gap	Thrive Solution
Incident Response Plan	
Active Directory/Service Accounts	
Disaster Recovery/Backups	
Email Filtering
