WHY USE MIMECAST WITH OFFICE 365?
DON'T TAKE OUR WORD FOR IT

78% SAVE MONEY by staying with Microsoft's E1 or E3 (versus E5) and using Mimecast

44% Experienced an **Office 365 outage** in the last 12 months

85% Do not exclusively rely on **Window Defender** to protect their endpoints

93% IMPROVED EMAIL SECURITY
Using Mimecast with Office 365 significantly improves defenses against **spam & email-borne threats**

89% customers agree they see **IMPROVED DEFENSES AGAINST BUSINESS EMAIL COMPROMISE**

TOP REASONS WHY CUSTOMERS USE MIMECAST WITH OFFICE 365:

1 Stops Phishing

"Mimecast's level of sophistication in dealing with malicious threats is significantly superior to that built-in to Office 365. Excellent detection rates for spam, phishing and other malicious attacks." - IT Specialist, Enterprise Retail

"We have yet to have any major spam outbreaks or influx of malicious emails, as they were all caught before being delivered to the end user." - IT Analyst, Enterprise Consumer Services

"Since implementing Mimecast the amount of impersonation or phishing emails that makes it to users is down about 90%." - Network Operations, Food Manufacturing

2 Provides True Backups

"Solid product that works well with little to no intervention. When I need to find an archived email, I can trust that Mimecast has it. Office 365 does NOT backup any content, so having an archive solution like Mimecast can be critical to meeting user expectations." - IT Director, Construction and Manufacturing

"Simplicity of recovering from the archive plus continuity mode should we lose access to O365." - IT Manager, Computer Software and Services

"Archive is extremely powerful and fast. Our compliance department loves it. We can now give access to the full email archive from any device." - IT Analyst, Enterprise Consumer Services

3 Improves Administrator Efficiency

"Once setup there is very little management required." - Senior VP of IT, Transportation Services

"Mimecast simplifies and facilitates top-notch email archiving, greatly enhances email filtering and management capabilities, facilitates unparalleled flexibility and customization options, and provides easy to implement and manage email continuity and disaster recovery services." - Systems Admin, Top 250 Law Firm

"Mimecast unifies the delivery and management of security, continuity and data protection for email via one, simple-to-use cloud platform." - Systems Admin, Computer Services and Software

4 Eases the Transition to Office 365

"Every email-related service I support is enhanced or improved through the use of Mimecast layered over top of whatever mail system we are running underneath Mimecast. It is no different now that we have migrated from Exchange on-premises to Exchange Online in Office 365. There was no re-evaluation necessary when we migrated from on-premises to O365 - there was never any question as to whether we would continue using Mimecast." - Systems Admin, Top 250 Law Firm

"Having recently migrated [to Mimecast] we have seen an increase in suspicious files being flagged by Mimecast which brings to light risky end user behaviour which the Microsoft products just don't see." - Network Operations, Municipal Government Public Utility

5 Ensures No Downtime

"Continuity mode should we lose access to O365." - IT Manager, Computer Software

"Mimecast provides easy to implement and manage email continuity and disaster recovery services." - Systems Admin, Top 250 Law Firm

"I like the continuity feature as there is peace of mind knowing if there is a failure to datacenters hosted in Europe - using locally based Mimecast datacenters, we can continue with our business which is solely email related." - Systems Admin, Computer Services

"Look into Mimecast's fail-over/continuity solution." - CIO, Insurance Services
