That's why we are bringing you a platform that delivers the flexibility you need, enabling AI everywhere—from edge to cloud—helping our customers achieve more.

MORE PERFORMANCE. MORE EFFICIENCY. AND MORE WONDERFUL.

3RD GEN INTEL® XEON® SCALABLE PROCESSORS
FROM CDW FOR DATA-DRIVEN ORGANISATIONS ARE:

1. The only data centre CPU with built-in AI acceleration, end-to-end data science tools and an ecosystem of smart solutions
2. Powered by Intel SGX, which protects data and application code while in use from the edge to the data centre and multi-tenant public cloud
3. Optimised for cloud, enterprise, HPC, network, security and IoT workloads with 8 to 40 powerful cores and a wide range of frequency, feature and power levels

POWER FLEXIBLE PERFORMANCE

3rd Gen Intel® Xeon® Scalable processors deliver a significant performance increase compared with the prior generation, with an average **46% improvement** on popular data centre workloads.

1.46x

Average performance gains over prior generation²

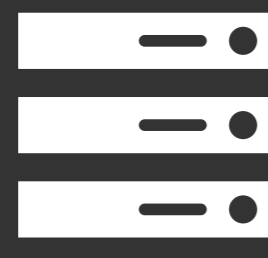

1.56x

Improvement in AI inference for image classification, generation over generation³

1.58x

Higher web microservices performance vs prior generation

Modern infrastructures are highly distributed, and organisations want to run cloud-native workloads everywhere across the distributed infrastructure. These include the data centre, public cloud, the edge and on mobile network infrastructure. Get the server that can power the broadest range of workloads—from the cloud to the network to the intelligent edge.

If you're a data-driven business, it is high time you met the 3rd Gen Intel® Xeon® Scalable processor-based servers from CDW.

Up to

1.72x

higher virtualisation performance vs prior generation

The latest 3rd Gen Intel® Xeon® Scalable processors deliver a balanced architecture with built-in artificial intelligence acceleration, crypto acceleration and advanced security capabilities. Intel's portfolio of hardware and software solutions bring customers the performance and flexibility necessary to deploy highly optimised, multi-cloud environments from the edge to the network to the cloud.

WE GET FLEXIBLE CLOUD PERFORMANCE
