COMPLETE DRONE SERVICES

DRONE TECHNOLOGY

⊕ Drone Services
DroneUp provides the right pilots with the right equipment and the right software to collect the critical data you need.

⊕ Training & Consulting
DroneUp's training & consulting group can help to create or enhance your drone program. We provide skills training, FAA waiver creation & consultation, and development for your operating procedures and guidelines.

⊕ Equipment
DroneUp uses our experience and connections in the industry to procure the right equipment for your operation.

TRANSFORMATIVE TECHNOLOGY

Companies are unsure about how to implement transformative drone technology into their business to remain competitive. DroneUp provides a full-spectrum of drone services and technology to assist businesses in defining, implementing, and scaling drone operations. As a result, our customers continue to be market leaders by streamlining inefficient processes.

A FULL-SUITE OF SOLUTIONS

DroneUp provides solutions for companies looking to outsource their drone collection and those looking to build or scale an in-house drone program. Our flight services group provides the right pilot with the right equipment using the right software to collect the data you need. For your in-house drone-program, DroneUp can provide training, consulting, and equipment to ensure your pilots are ready for their missions.

DroneUp's customers using drone services can count on innovative drone solutions that will cut costs, improve productivity and safety, and increase ROI.

FLIGHT SERVICES

DroneUp provides the right drone pilot with the right equipment and software to collect your data. Augment your team with ours or contract with us for your entire drone operation.

TRAINING & FAA WAIVER CREATION

DroneUp provides drone pilot ground and flight school to help build pilot proficiency and become an FAA-certified 107 pilot. We customize our training to meet your operational needs, and offer FAA waiver creation and consulting.

EQUIPMENT

Your project will need the right equipment. DroneUp's experience in the industry ensures your operation procures the right equipment for the job.

DRONE PROGRAM DEVELOPMENT & IMPLEMENTATION

DroneUp builds your program from the ground up or assists with program components that are more challenging. We build the policies and procedures for safe flight operations leveraging best practices.

RESEARCH & DEVELOPMENT

Developing your organization's drone solutions begin with DroneUp. As a leading innovator for drone applications, platforms, programs, hardware, software, and policies, our commitment is to ensure you are at the forefront of industry transformation.

Drones have proven to be **7 times faster** than alternative methods.*

Leveraging drones can increase safety on site by **55%**.**

Unmanned aircrafts are roughly **1/10**th the cost of traditional ground-based methods.*

In 2018 Drones saved an estimated **$14.4M** over previous strategies.*
