

Protect Your Facility

Be at the cutting edge of safety by purchasing this bundle of the latest technology in infection prevention.

ThermalPass Portable 100 Series Temperature Detection System

ThermalPass Temperature Detection System identifies potential risk carriers by using multiple thermal sensors to detect elevated body temperatures accurately, efficiently, and discretely.

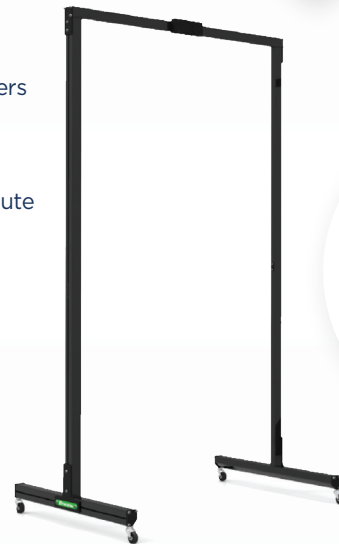

- 24 thermal sensors in each device scanning 1,200 temperatures per minute
- Capacity of up to 60 people per minute
- Non-contact temperature measurement
- Accuracy of $\pm 0.4^{\circ}\text{C}$
- Dual zone temperature system
- Configurable audible and visual alerts
- Does not encroach on privacy
- Real-time analytics and enterprise integration
- Accommodates wheelchairs, strollers & groups of 2 (parent & child)

> **\$9,399.99 each** | MSRP

Coptek Copper Clean Door Knob & Light Switch Protectors

- Simple and elegant adhesive copper cover to retrofit over high-touch surfaces like door handles, bathroom push plates, elevator buttons, and more
- Continuous exponential decay of microorganisms, killing 99.9% of bacteria such as MRSA, and E. Coli within two-hours

> **\$323.99 /package** | MSRP
(assorted types & sizes)

Lighter weight
for
easy transportation

TVX - X1B Electrostatic Sprayer

- Includes 2 lithium-ion batteries & charger
- Electrically charged droplets of solution provide total and even coverage of a surface or object including hard to reach areas and wrap completely around the object

> **\$1,110.99 each** | MSRP

Germzone

UV Air Sanitization and Disinfection

The AEROBIOTIX® Germzone® HUAIRS is the ONLY technology scientifically tested on SARS-CoV-2 aerosols and clinically proven to eliminate 100% of airborne SARS-CoV-2 (COVID-19) on a SINGLE pass. *

The ultraviolet chamber is completely shielded to block all UV-C light emissions, making it safe to operate in any occupied space. Create a safer indoor environment free from harmful airborne contaminants approximately 400-600sq. ft.

> **\$2,999.99 each** | MSRP

* Battelle Biomedical Research Centre (COVID testing completed October 13, 2020)

- Medical Grade Technology designed for Upper-Room installation where most in-room viruses and bacteria live
- Germicidal UV reaction chamber to inactivate viruses and bacteria
- Sound level 55 dB
- State of the art photolytic technology with patented germicidal irradiation system
- Safe for use in occupied areas - no unsafe UVC emission
- Flexible intake for source capturing during any procedure
- Small and portable, mounts to upper wall

Delivers a healthy and safe environment for employees, clients & customers

Kontrol BioCloud® Air Quality Analyzer

BioCloud is a Canadian Made real-time analyzer designed to detect airborne pathogens. It has been designed to operate as a Safe Space Technology™ by promoting air circulation, monitoring the air quality and sampling continuously for pathogens like viruses, bacteria and fungi.

The BioCloud analyzer combines a proprietary SARS-CoV-2 detection chamber with an advanced air sampling process. When a virus of concern is detected an alert system is created in the Cloud or over local intranet.

> **\$14,999.99 each** | MSRP

Proximity UV-Cube UV Disinfecter

The UV-Cube inactivates viruses and bacteria on a variety of high touch items such as handheld medical equipment and devices like small portable tablets and cell phones. Regular cleaning with UV-C light could be an effective strategy to reduce the transfer of pathogens while being safe for you and patients.

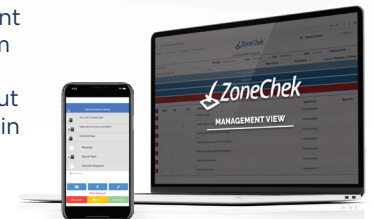

- UV-Cube is a smart UV disinfection device
- 100% ozone-free with zero maintenance
- Three modes: UV Clean, UV Clean & Dry, UV Clean & Store
- Countdown timer and auto off feature

> **\$549.99 each** | MSRP

ZoneChek™ COVID Tracker & Reporting Tool

ZoneChek™ from Efficient Apps was designed from the ground up to meet the needs of essential but neglected departments in large organizations.

Our system revolutionizes the operation of departments that have hundreds of staff, and millions of dollars in annual budgets. Their work is so critical, that increasing their effectiveness saves lives. The focus is to meet the needs of the groups responsible for cleaning and infection prevention, they are known by different names including Environmental Services.

> **\$664.99 each** | MSRP

EnviroNize® Anolyte Hypochlorous Acid (HOCL)

For use as a disinfectant for hard non-porous surfaces in institutional and janitorial applications.

- High ORP solution
- Attacks an array of microbial organisms
- A powerful antimicrobial solution that is both biodegradable and non-accumulative
- Contains concentrated electro-chemically activated solution rich in oxygen
- Health Canada DIN Registered
- PROCERT Organic Input Certified
- Non-WHMIS Regulated
- Natural Ingredients and Ph Neutral

> **\$999.99 each (10 cases)** | MSRP
