

Asahi**KASEI**

Re: CONEG Letter

Dear Valued Customer,

Sun Plastech Inc., is a wholly-owned subsidiary of Asahi Kasei Chemicals Corporation in Japan. Sun Plastech Inc. (SPI) is strictly a sales, technical support, and distribution office for our only product, ASACLEAN Purging Compound. ASACLEAN consists of various product grades, some of which are manufactured overseas in Japan, and some which are manufactured by our sister facility, Asahi Kasei Plastics North America in Michigan. All finished product is warehoused in public warehouses throughout the U.S.

To the best of our (SPI's and Asahi Kasei's) collective knowledge, we do not intentionally use any lead, cadmium, mercury, or hexavalent chromium in any ASACLEAN products.

Please let us know if you have any questions or require additional information.

Best regards,

Jarred Packard  
Project Engineer  
Sun Plastech Inc. (Asahi Kasei Group)
