## BELT MANAGEMENT

### MAXIMIZE LIFE. REDUCE COST.

Remove the risk of failures and maximize the life of your belts through the use of our exclusive OnGuard® Belt Management Program. Our industry experts can provide on-site surveys of your systems, and in conjunction with our belt analyst software, help recommend the right belt for the application. All to ensure the longest life, offer you the best overall value and ultimately lower your cost per ton conveyed.

And by utilizing our proprietary software, OnGuard Asset Tracker, we can log each of your conveyor belts and track them from “cradle to grave.” This provides the ability to access any logged information for the belt, including detail on: installation, repairs, inspection reports, photos and more.

### CONVEYOR BELT MANAGEMENT SERVICES

#### YOUR FIRST LINE OF DEFENSE AGAINST:

- Premature Belt Wear
- System Breakdowns
- Costly Downtime
- Material Spillage
- Excessive Maintenance
- Tracking Issues

### PROVIDING ANSWERS TO YOUR TOUGHEST QUESTIONS

What is the best belt for my application?  
When was the last time our system was inspected?  
Where is the documentation on our belts?

How old is my belt?  
Are our belts properly installed?  
Are our belts well-maintained?  
Is our equipment safe?

### SERVICE VALUE

Safety and solutions through our expertise and technology. We bring our belting expertise and belt management services directly to your door. Our team is factory and MSHA certified and committed to our company's focus on safety.

Our industry experts can provide on-site surveys of your systems, and in conjunction with our belt analyst software, help recommend the right belt for the application.

We bring our belting expertise and belt management services directly to your door. Our team is factory and MSHA certified and committed to our company's focus on safety.

OnGuard™ stores all of your belt information including type of belt, installation date, equipment number, length and width, location, and any other relevant site audit information.

## WHY ONGUARD FOR BELT?

OnGuard® Asset Tracker Services include cloud based conveyor belt tracking which we manage for you. OnGuard® Asset Tracker is our proprietary cloud based asset management database. OnGuard stores all of your belt information including type of belt, installation date, equipment number, length and width, location, and any other relevant site audit information. We can also track your critical hose assemblies. See [HoseSafety.com](http://HoseSafety.com) for more information.

### RECOMMENDATIONS

Our visual inspection crews perform Belt Surveys of equipment with our proprietary analysis software.

### INSTALLATION

Our crews and equipment installs, vulcanizes, fastens or strings belt onsite; whether heavyweight or lightweight.
