## Aggregate

### CONVEYOR BELT

#### TRS History

Texas Rubber Supply is an industrial rubber products distributor providing industrial hose, conveyor belting and rubber supplies to the Dallas, Texas area since 1952.

#### Belt Installation

TRS has the crews and equipment to string, install, vulcanize or fasten, and wind up most any belt, big or small.

### TEXAS RUBBER SUPPLY AGGREGATE BELT *FOR SUPERIOR PERFORMANCE*

Aggregates are the most mined materials in the world. With demand being so high we have to be sure we can supply. Texas Rubber Supply offers many products that will keep your equipment running smoothly during high demands.

When moving heavy material, you'll need something heavy duty. We recommend using our own line of belting. Tough and Tested Tough, our belt is designed for strength, minimum stretch and maximum fastener retention, to maximize conveyed per dollar spent.

### CHOOSE YOUR SERVICES

#### Belting

- On or off-site installation and vulcanization
- In-house custom slitting to any width up to 72" wide
- Mechanical Fastener installation
- Pulley lagging and repair
- And MORE!

#### Hose

- On-Site and In-House hose inspections
- In-House hose testing
- Identify current hose issues and repair/replace the defective components
- Spec-ing and routing hoses

# Hose Products

## INDUSTRIAL & HYDRAULIC

### TEXAS RUBBER SUPPLY INDUSTRIAL HOSE PRODUCTS *FOR SUPERIOR PERFORMANCE*

For material that can't be moved via conveyor belt, try one of our hose assemblies. Whether it's liquid, or pellets, we have just the assembly for your application. Our full line of hydraulic and industrial hose assemblies are manufactured by certified builders using only the best products.

### ONGUARD ASSET MANAGEMENT

Remove the risk of failures and maximize the life of your conveyor belts through the use of our exclusive OnGuard Belt Management program. Our industry experts can provide on-site surveys of your systems, and in conjunction with our belt analyst software, help recommend the right belt for the application.

**[BELTMANAGEMENT.COM](http://BELTMANAGEMENT.COM)**

Reduce the risk of hose failures through routine hose inspections, testing and certification programs. Our OnGuard® hose management services include testing, tagging and traceability of your hoses from "cradle to grave". These proactive programs are managed by our hose experts and keep you running efficiently and safely.
