

SNOW PLOW BLADES

A seasonal item, but indispensable when snow piles up. These press cured blades are made from premium SBR belt cover stock for extra abrasion resistance. These blades are bolted onto the business edge of the road patrol and used to remove snow from highways, parking lots, airport runways and other public areas. Popular sizes are 1-1/2" thick 10" wide 8, 10, 12, 14, 16, and 20 feet long with mounting slots.

Textured Impression

- 2400 lb. Tensile
- 640% Elongation
- 1100 Modules

Meets or exceeds
ASTMD-2000

BENEFITS

Made of resilient rubber compounds pressured to eliminate delaminations!

Gouge and abrasion resistant for maximum performance over any surface condition for smooth operation!

Yields higher snow removal by quickly penetrating through the heaviest snow and wiping surfaces clean!

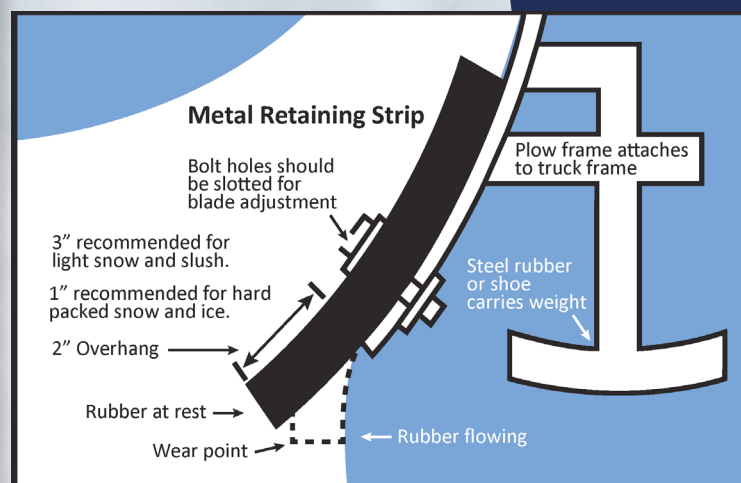

Offers high speed and runs easily adjusting to surface abnormalities for quick, damage-free snow removal!

Low maintenance costs and downtime because they have to be changed less frequently than steel blades!

TYPICAL RUBBER BLADE ATTACHMENT

GREATER IMPACT ABSORPTION = REDUCED EQUIPMENT SHOCK = LESS FATIGUE/WEAR ON PLOW

Remove the risk of failures and maximize the life of your belts through the use of our exclusive OnGuard® Belt Management Program. Our industry experts can provide on-site surveys of your systems, and in conjunction with our belt analyst software, help recommend the right belt for the application. All to ensure the longest life, offer you the best overall value and ultimately lower your cost per ton conveyed. And by utilizing our proprietary software, OnGuard Asset Tracker, we can log each of your conveyor belts and track them from "cradle to grave."

- Defend Against Excessive Maintenance With Expert Site Surveys
- Maximize your Belt Life by Utilizing Our Belt Analysis Software
- Have All Your Belt and Service History Electronically Stored in One Central Location!

Product Experts in:

- Hose, Fittings & Accessories
- Conveyor Belt
- Gaskets & Sheet Rubber
- Industrial Supply

CONSISTENT QUALITY FABRICATION

Hose Assembly

- Hydraulic, Industrial, Composite, Metal & Specialty
- Crimping from 1/16" ID to 10" ID
- Swaging 1" ID to 10" ID
- Eaton/Aeroquip Certified Fabrication EXPRESS stores
- UL Audited Goodyear/Contitech STAR Hose Fabricators
- Partners of NAHAD/Hose Safety Institute

CUSTOM PROVEN SOLUTIONS

- Hose Management Programs
- Hose Routing Surveys On-Site
- Conveyor Belt Installation
- Proprietary Belt Analysis Software
- Conveyor on-site vulcanization
- Elevator Buckle Belt Punching
- Waterjet/CNC cutting for Gaskets
- Vendor-Managed Inventory
- OE Kitting ... and more!
