

HungerRush HRT200

Boost Profits with the HungerRush Handheld Ordering System

Arm your staff and stack your arsenal with the new HungerRush handheld ordering system. Whether you are taking care of guests on the patio, taking orders at the counter, curbside, or in the drive-thru, fulfilling orders with the HungerRush ordering system helps you do it with ease and efficiency.

Built for rush hour

- Water-resistant to survive accidental bumps and spills
- Eight full hours of battery life, to get you through your shift
- EMV chip reader secures your customers from fraud and you from chargebacks
- Offline mode keeps you operating when the internet fails you

Delight your guests with their safety and security in mind

- Offer secure EMV chip payment for faster checkouts
- Digital receipts = less human contact with paper and pen
- Order and pay quickly where your customers are, no more back and forth to the POS

Increase throughput, minimize human contact and allow for faster customer service while enhancing your guests' experience.

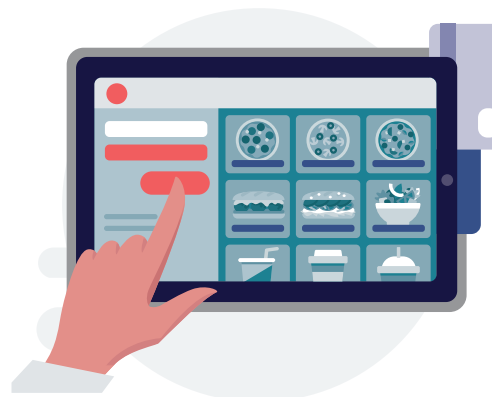

From curbside pickup to curbside payment

- Increase profits with more orders per hour
- Sleek design, purpose-built hardware that's made to withstand your busiest days
- Reduce your team's need to share terminals with a mobile handheld operating system

Reduce labor costs and improve efficiency

- Keep your best employee's happy, with on-screen tip suggestions
- Orders go directly to the kitchen for optimal efficiency
- No more mass orders to the kitchen or staff fighting over terminals
- Taking orders at your guest's table, curbside or in the drive-thru; means fewer human mistakes

HungerRush™

Our HungerRush handheld ordering system is designed to maximize revenue by processing orders quicker, busting long lines, and equipping restaurants to work more efficiently so you can spend more time providing a great customer experience. Our Restaurant Management System provides centralized and comprehensive data and visibility related to your other integrated services such as mobile & online ordering, loyalty, delivery management, and HUB, your command center for reporting and management.
