Overview

Hub Edge computer for medium and large installations.

Processing

The Hub is a powerful computer running a Linux operating system and Atamate software.

Power

100-250Vac, UK 13A plug power supply unit.

Installation Information

The Hub can be installed by any qualified electrician.

The Hub is powered from a plug-in power supply unit The Hub relies on convection air currents for cooling so needs good free air movement.

Mounted on a vertical surface

Cable entry from the side of the unit.

Requires connection to the LAN, HAN and power supply unit.

Environmental

Humidity: 10 to 90% RH

Temperature: 5 to 40 C

Water/dust protection: IP20

The Hub is part of an Atamate smart building installation.

This is to be designed and commissioned by Atamate Partners.
