

concardis Service Connector

All payment methods in one module

Whether on account, by credit card or PayPal – The Concardis Service Connector includes all relevant payment methods and further payment methods can be added without technical effort.

Adapting your products to a specific market can be a challenge that involves a lot of complex processes. To successfully reach your target group, the following aspects are essential:

- Providing high-quality content in the local language.
- Offering a product selection that meets customer expectations.

However, it is often overlooked that every market and target group have their own payment preferences as well. Derived from that it becomes more and more important to offer a wide range of different payment methods. Subsequently, B2B and B2C scenarios are equally enriched with simplicity and convenience. This in turn instantly elevates the online shopping experience and is accompanied by increased customer satisfaction.

How to meet and easily realize the requirements for a comprehensive payment solution? By integrating the Concardis Service Connector in your Intershop Commerce System!

Based on the new Payment API for the current ICM 7.10 version, the connector adds Concardis payment methods, like Mastercard, American Express, PayPal, iDEAL, Alipay, WeChat Pay, and many more to your Intershop installation. The customizability of the Concardis Service Connector allows you to easily add further or to only show specific payment methods if additional conditions are met.

The services connector answers all questions of compliance with banks and regulations, scalability, performance, usability and security. At the same time your preferences are feasible in your Intershop Commerce Management. The best part: all your channels, B2B and B2C, benefit from these functionalities.

Benefits

- Part of the Intershop Solution for European customers.
- The connector is available out-of-the-box and can be used flexibly.
- Immediate access to all implemented and enabled payment methods, like Mastercard, American Express, PayPal, iDEAL, Alipay, WeChat Pay and many more.
- Access to more than 250 payment methods and finance service providers.
- Security First: Concardis realizes secure processing of payment transactions.
- Concardis offers a full range of fraud prevention checks.
- By using the Concardis Payengine, the merchant easily obtains a PCI DSS SAQ-A status.

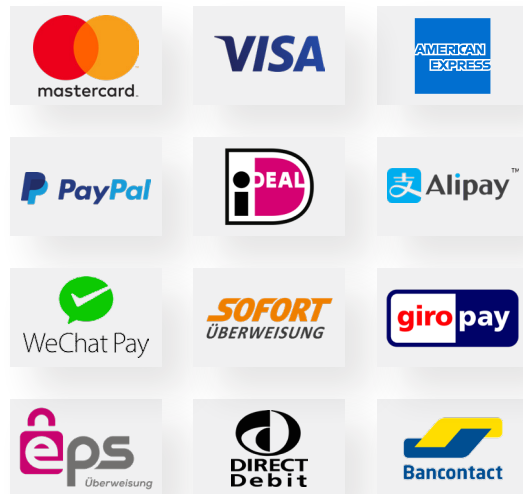

Worldwide Applicable: Add and Manage International Payment Methods

Activate it and get started! With the pre-integration of the Concardis Service Connector, the following payment methods are added to your Intershop Commerce System by default:

- Credit Card payment including 3D Secure v2 enables your customers to pay with Visa, Mastercard, American Express, JCB and Diners Club. For payment transactions by credit card different payment management options are available:
 - **Capture** to request the settlement of the payment
 - **Cancel** to abort the transaction
 - **Refund** to return (parts of) the captured amount
- Online payment methods include EPS, iDEAL, GiroPay, PayPal, SEPA Direct Debit, Sofort, Alipay, WeChat Pay and Bancontact. In addition to the Capture, Cancel and Refund operations, online payment transactions can be managed in various ways, depending on the payment method:
 - **Auto Capture** to capture payments automatically after the authorization
 - **Reduce** to request a partial reduction of the authorized payment amount

Easy to Operate: Keep Your Payment Statuses up to Date

The link between Intershop Commerce Management and the Concardis Service Connector makes it easy to synchronize payment transactions. Therefore notifications are sent by Concardis to Intershop Commerce Management in order to update the payment status automatically. This then results in an update of the respective order.

You would like to know more about the functionality of the Concardis Service Connector? Take a look at the [Public Release Note](#) or contact:
