
Dr. Brad Bialczyk

Geriatrician

Dr. Bialczyk is passionate about treating the whole person, helping people achieve their goals, and assisting with advance care planning. He feels a sense of responsibility to clients and their families to help them navigate their journey through life, understanding their options, and determining their care choices. With a passion for end-of-life and advance care planning, he is always willing to help seniors and their families discuss what is most important to them and their overall life goals.

Previously an internal medicine hospitalist with Voyage Healthcare, Dr. Bialczyk has more than 16 years of experience in the healthcare industry. He appreciates the importance of providing top-quality care while also being mindful of the associated costs for his clients. In his words, "Medicine as a field does a lot of things to people that are not required and add significantly to the cost of their healthcare." This mindset has made him an ideal fit with Lifesprk's philosophy of high-quality, value-based care where the focus is always on the person and what is best for them and their unique situation and goals.

When he is not working, Dr. Bialczyk finds his spark spending time and creating memories with his wife and kids. He and his family enjoy outdoor activities. He is a supporter of local zoos and the Minnesota Arboretum. He and his wife have also played together on the same softball team for more than 15 years and enjoy time with their teammates.

PERSONAL INTERESTS

Softball, hiking, camping, and visiting national parks.
