Professional Services

We have packaged a host of service propositions that can be tailored to meet your specific business objectives:

- Technical Support
- Network Audit & Health Check
- Patching & Upgrades
- Wireless Surveys
- Penetration Testing
- Systems Design

Insight & Analytics

In order to support good decision-making and operational excellence, big data needs to be turned into actionable intelligence. We provide a range of analytics tools that help systems managers and IT professionals gain greater visibility over systems performance and user behaviour. Services include:

- Network Monitoring & Management
- Application Performance Management
- User Activity Monitoring
- Smart Buildings
- AI Assisted Security

Technology Partners

We are recognised by these global brands as one of the leading integration partners in Europe, with acknowledged expertise in the fields of networking, communications and cyber security.

smart. simple. secure

Established for over 25 years, digital transformation is the driving force behind the evolution of Datrix services and solutions. Our professional and technical services teams adopt a consultative, client-centric approach that sees us design, build and manage superior solutions.
