

## Fugue FastTrack: Accelerate your Cloud Security

Fugue helps teams move faster than ever in the cloud—without compromising security and compliance.

**A simplified, actionable cloud compliance report in 15 minutes.**

- ✓ Comprehensive, prioritized remediation roadmap
- ✓ Detailed remediation guidance for every violation
- ✓ Interactive map of your environment and security posture

**Bring your cloud environment into compliance in 8 weeks.**

Fugue FastTrack gets you up and running with Fugue quickly to realize immediate and lasting value. With Fugue FastTrack, you get:

- Full visibility over your cloud environment and security posture within minutes. This includes an interactive map of your environment and detailed information on every compliance violation.
- The support you need to bring your cloud environment into compliance in 8 weeks. Fugue will provide you with detailed remediation guidance for every violation and help in fixing them.
- Hands-on assistance to help you learn how to maximize the value you and your team get from Fugue so you can start moving faster in the cloud—without breaking the rules.

### How Does Fugue FastTrack Work?

Simply add Fugue FastTrack to your Fugue subscription and our Customer Success team will immediately start working with you to kick start your journey. Together, we will:

- Launch Fugue for up to 3 cloud accounts\*
- Audit your environment against the CIS Foundational Benchmarks + the Fugue Best Practices\*\* compliance families

- Implement up to 10 custom rules derived from a predefined list of rules
- Work together to remediate identified compliance violations within 8 weeks
- Complete Fugue integration with one external tool of choice (optional)\*\*\*
- Complete Fugue foundational training, a one-hour course (train the trainer model) with up to 4 members of your team

### How Do We Get Started?

Once you've added Fugue FastTrack to your Fugue subscription, you will work with our Customer Success team to:

- Define and document goals and success criteria
- Identify your target cloud accounts
- Create your Fugue account

The audit with Fugue only takes 15 minutes. We'll review the results with you and move forward together to bring your environment into compliance.

## The Project Phases

The Fugue FastTrack framework is comprised of three simple phases that incorporate proven approaches to turn your audit report into an action plan that ensures you get maximum value from Fugue.

### Week 1 Kick-off & Design

- ✓ Review goals and success criteria
- ✓ Project timeline
- ✓ Identify user + RBAC groups
- ✓ Define custom rules
- ✓ Identify integrations needed
- ✓ Schedule training

### Week 2 - 3 Onboarding

- ✓ Create a Fugue Role with your Cloud Service Provider
- ✓ Onboard users & cloud accounts
- ✓ Configure your notifications
- ✓ Complete Fugue training

### Week 4 – 8 Operationalize & wrap-up

- ✓ Review compliance issues from your audit
- ✓ Create a remediation plan
- ✓ Implement remediations for each violation
- ✓ Implement custom rules and build integrations
- ✓ Project wrap-up

## Why Fugue FastTrack?

Traditional cloud security tools involve complex setups to get started and require significant engineering resources and expensive services for products marred by a poor user experience and inflexible features and rules capabilities.

Fugue FastTrack is designed to deliver real and immediate value with Fugue while training our customers to maximize the value they receive over the long run for their specific cloud security use cases.

## The Fugue Guarantee

Fugue FastTrack is a small investment with a big payoff: proving cloud security and compliance with minimal investment in time and resources.

The Fugue FastTrack package is \$10,000 in addition to your Fugue subscription. We're so confident that you'll get immediate value with Fugue that if we don't achieve the goals we document together as part of the project, you can cancel your subscription to Fugue and get your subscription fees refunded\*\*\*\*.

Let's get started today and get you moving faster in the cloud—without compromising security and compliance!

\* Cloud account means AWS Account, Azure Subscription, or Google Cloud Project

\*\* The Fugue Best Practices is a set of rules that address cloud misconfiguration risks that are typically overlooked by industry compliance frameworks.

\*\*\* Integrations include any tool that allows for integration with SNS or the Fugue API. Examples include Slack and Jira.

\*\*\*\*This offer valid for new Fugue customers only.

**RED | VENTURES**

Deployed Fugue at-scale in one week and gained immediate visibility over their entire cloud footprint.

**SPARKPOST**

Eliminated manual processes to assess the security posture of tens of thousands of cloud resources.

**SAP**

Dramatically shortened the approval time required to provision cloud infrastructure environments.
