Fugue

Automate Cloud Security and Compliance from Code to Runtime

The only platform with a unified policy engine so you can operationalize security pre- and post-deployment.

One Platform to Support All Your Cloud Infrastructure Security Needs

Dramatically reduce the risk, cost and engineering time to secure your cloud infrastructure.

Ensure Continuous Cloud Compliance

- Turnkey coverage for industry compliance families
- One-click compliance reporting and interactive posture maps
- Prioritized remediation guidance for every violation

Shift Left with Infrastructure as Code Security

- One policy engine for infrastructure as code and the cloud runtime
- Security checks in git workflows and guardrails in CI/CD
- Automatic developer feedback

Manage Cloud Native Runtime Security

- Common and complex vulnerability detection
- Cloud Indicators of Compromise (IoC) tracking
- Automated remediation for security-critical resources

Gain 50% more efficiency

Build policy into infrastructure as code with automated tools.

Deploy 3X faster

Implement secure cloud resources in hours with less staff.
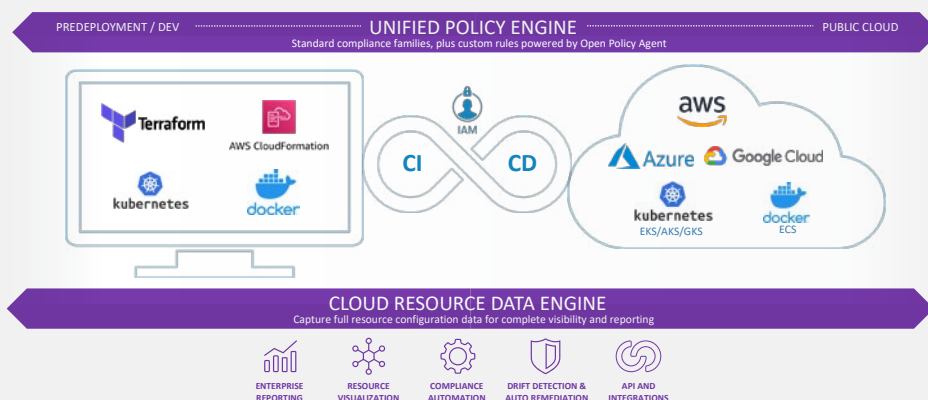

Speed compliance by 60%

See your complete posture in minutes and remediate faster.

Built for Developers, By Developers

Run security checks on your infrastructure as code (Terraform; AWS CloudFormation; Kubernetes Manifests; Dockerfiles) during development and in CI/CD. Receive fast feedback and remediation guidance so you deliver secure cloud infrastructure faster.

The Fugue Platform

Fugue manages cloud security and compliance across all the cloud native platforms and tools.

PREDEPLOYMENT / DEV — UNIFIED POLICY ENGINE — PUBLIC CLOUD
Standard compliance families, plus custom rules powered by Open Policy Agent

Terraform AWS CloudFormation kubernetes docker IAM CI CD aws Azure Google Cloud kubernetes EKS/AKS/GKS docker ECS

CLOUD RESOURCE DATA ENGINE
Capture full resource configuration data for complete visibility and reporting

ENTERPRISE REPORTING RESOURCE VISUALIZATION COMPLIANCE AUTOMATION DRIFT DETECTION & AUTO REMEDIATION API AND INTEGRATIONS

Unified Policy Engine

Apply security and compliance consistently across the development lifecycle using the same policies Built on Open Policy Agent — the open-source standard for policy as code and a Cloud Native Computing Foundation graduated project.

Centralized Reporting for Cloud and IaC Security

Track cloud compliance progress and automate reporting for management and auditors.
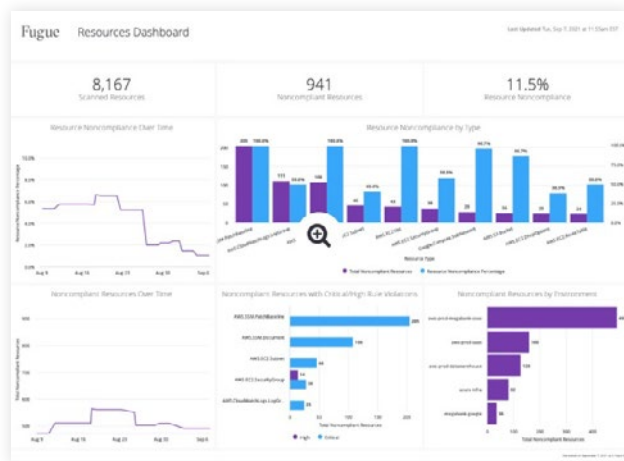

## Interactive, Exportable Maps of Cloud and IaC Security

Build a shared understanding of IaC and cloud environments and explore all resources, configurations, and relationships.

Trusted by leading organizations. See why customers give Fugue a 93+ Net Promoter Score.

Automated compliance reporting and dashboards

Spend less time on manual audits and continuously prove cloud compliance to auditors and stakeholders with informative dashboards, one-click reports and automated notifications.

Leverage hundreds of pre-built rules mapped to industry compliance families and develop custom rules that address multiple resource vulnerabilities such as SOC 2, NIST 800-53, GDPR, PCI, HIPAA, ISO 2700, CSA CCM, CIS Controls and CIS Foundations Benchmarks for Amazon Web Services, Microsoft Azure, Google Cloud, Kubernetes, and Docker.
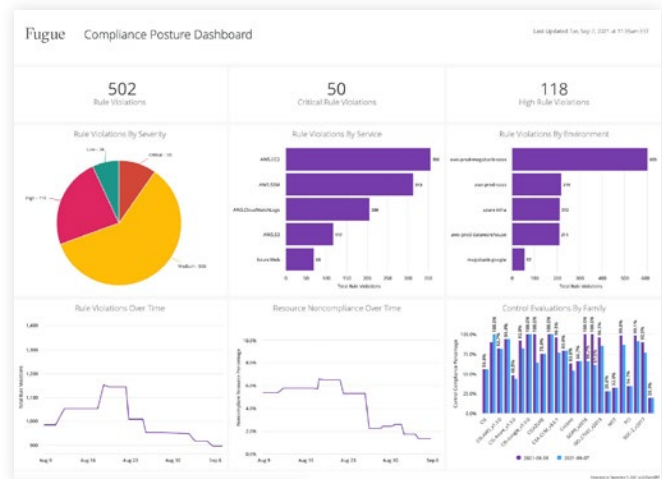

Your Success Is Guaranteed

We're so confident that you'll get immediate and lasting value with Fugue that we guarantee it.

· Get an actionable cloud compliance report in 15 minutes.

· Bring your cloud environment into compliance in 9 weeks.
