# A Code Audit is Essential to Your App's Success

Big Nerd Ranch

57% of users will abandon your app or mobile website if it takes 3 or more seconds to load.

90% of users have stopped using an app due to poor performance.

Your app has to perform on a number of fronts: speed, security, scalability and code quality are all key. A Big Nerd Ranch code audit is critical to ensure that your app delivers throughout its lifecycle.

A code audit benefits your app – and your company.

Mobile moves quickly, and regular code audits are necessary in order to stay competitive.

A code audit offers a comprehensive analysis of your app's code, discovering bugs, security vulnerabilities or violations of programming conventions. In just a few weeks, we'll deliver recommendations that will help you better reach your app's users, grow your base and improve revenues for years.

Our objective assessment enables your team to get an
 accurate view of the state of your code and identify the improvements that offer the most impact.

After your code audit is complete, we will deliver our recommendations for the future of your app, starting with a stable and secure codebase.

Big Nerd Ranch

You're going to need a bigger nerd.

Since 2001, Big Nerd Ranch has worked to bring brilliance to life. We achieve this by establishing true partnerships with our clients and by providing a team of engineers, designers, QA testers, and project strategists to guide your digital product from discovery to launch. These same Nerds can join your company's team to take a project across the finish line or train them on the latest and greatest technologies.

We're proud to work with startups and Fortune 100 companies building authentically useful applications and transforming vision into advantage.

And, as a winner of the 2019 AJC Work/Life Balance Award, we work as hard on our culture as we do on your projects.
