

Fixing Prior Authorization

Providers' costliest administrative transaction¹

The Problem: Prior authorization costs more than it saves²

Prior Authorizations (PA) are partly or all manual³

Providers say PA delays negatively impact clinical outcomes⁴

Providers say PA puts a high burden on clinicians and staff⁵

The Solution: Automated technology and workflow redesign

1 Move back-end workflow to begin at point of referral or order

2 Electronically ingest orders via prior authorization technology

What This Looks Like

Provider conducts highly automated prior authorization checking at point of order:

STEP 1

Runs payer rules in real-time:

- Network Check
- Eligibility Check
- Member Benefits Determination

STEP 2

Applies algorithm and rules to determine likelihood of PA requirement

STEP 3

Schedules the appointment when prior authorization is secured

The Result: Save time and reduce costs

Reduced spend through automated PA⁷

\$68,274

Annual savings per physician when time is converted to dollars⁸

\$10.92
cost of manual PA⁹

VS

\$1.88
cost of electronic PA¹⁰

=

\$9.04
savings per PA

Ready to drastically reduce costs, eliminate waste and improve your patient experience?

Read [Why Automation is a Must for Prior Authorization](#) and [contact us](#) today for an assessment of your current prior authorization workflow.

R1RCM is a leading provider of technology-enabled RCM services which transform and solve revenue cycle performance challenges across hospitals, health systems and group physician practices. R1's proven and scalable operating models seamlessly complement a healthcare organization's infrastructure, quickly driving sustainable improvements to net patient revenue and cash flows while reducing operating costs and enhancing the patient experience.
