Widely-Used Platform

Athennian helps over 1500 monthly active users manage over 130,000 entities and growing.

- **Scale Your Entities, Without Scaling Your Overhead**

Athennian's cloud-based platform makes entity management more efficient, by building in automation, customizable workflows, dynamic reports, and self-serve digital experiences.

- **Cut Costs And Operate More Efficiently**

Athennian gives stakeholders instant access to the insights they need to make data-driven decisions. Simultaneously, legal teams that rely on their database every day, can view, modify, and share data that is responsive to what they need.

• Security That Meets Your Standards

Athennian is SOC 2 Type II certified, providing reliability and peace of mind to legal teams.

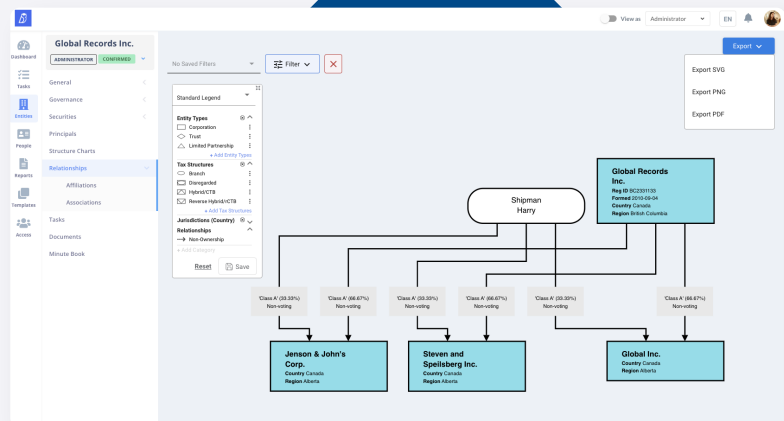

In 2023, NorthRiver increased its entity count by over 40% from the previous year. That surge in funding growth not only represents an increase in business activity – it also represents a significant amount of administrative work. With Athennian in place, however, the work has been manageable, and NorthRiver no longer pays a third party for tasks like document scanning and emails.

Athennian Case Study NorthRiver Midstream Inc.

NorthRiver Midstream Inc. is one of North America's leading gas gathering and processing businesses. The company provides connectivity for its customers to major demand markets including the U.S. Pacific Northwest, U.S. Midwest and Western Canada.
