

"People were simply blown away with the quality of the graphics and details on our product. I want to thank VMS for the extra effort to help us produce such amazing results in such little time. I look forward to the future successes that will come from our partnership."

Jason Wroblewski,
Industrial Designer, ISDA
Stryker Medical

Visual Marking Systems has more than 50 years of experience in manufacturing the highest quality graphic overlay, faceplates and nameplates. We are a high performance supplier for the original equipment manufacturing industry and provide our customers with a clean, finished look that communicates vital information to the equipment operator. Located in Twinsburg, Ohio our family of 115 employees strives to provide our customers with exceptional quality products and services.

Building relationships and maintaining customer loyalty is a key factor at VMS. We strive to continuously provide you with products that are up to your standards. Our Product Innovation Team specialists help work through the details with you and can make recommendations about the appropriate materials, sizes, optimal layout and even design aesthetics.

We manufacture products such as overlays, decals, labels, warning stickers, roll labels, and faceplates for a wide

variety of equipment manufacturers. These can be made for machine or hand assembly, high temperature resistance, chemical and solvent resistance. Embossed keypads, digital LED windows, control panels, gauges, and various custom design and assembly solutions are also available.

With multiple manufacturing capabilities, VMS offers the latest proven technologies in silkscreen printing, digital latex, UV, and EP printing. We also have embossing, laminating, pressure sensitive adhesives, die cutting as well as other assembly, application and inspection capabilities.

VMS is an ISO certified facility where every part is inspected prior to shipment, guaranteeing a superior product. With our ISO:9001 Quality System, PPAP/ First Article Process, and numerous REACH, RoHs and UL certifications, we can take your project to the next level and turn it into a strategic relationship by offering products that outlast, outshine and outperform the competition.

Equipment overlays, nameplates and faceplates can convey branding and caution and safety information, as well as save valuable assembly time in your shop due to the simple, one-piece installation process. Your company's logo should appear on your product in a highly visible, aesthetically-pleasing manner to promote your brand to your customers. Let VMS help you start the process today and manufacture quality products to exceed your expectations.
