> 7.700 customers worldwide > 181 partners > 1.550 employees > 50 offices

OUR SOFTWARES are validated by more than 1.500 customer installations worldwide. Their sustainability for 25 years is a guarantee of safety and constant innovations. Capitalize you knowledge in “just one click” to save time and money.

“**Skill FMEA Pro**” incorporates all the experience acquired for 25 years. It is the key reference for risks analysis and the world leader in FMEA software for automotive, aerospace, pharmaceutical, watch-making and jewelry industries. Every day, new sectors of activity are increasingly using “Skill FMEA Pro” for their risks analysis.

“**Skill Infra Convert**” appeals all companies working on CAD drawings. The automatically extraction of information is a major asset to save thousands of man-hours and to avoid data entry errors.

“**Skill Production Reader**” : From the control plan to the job instruction... From the control plan, the operator directly accesses the characteristics to be checked at the workplace, with the exact values / tolerances.

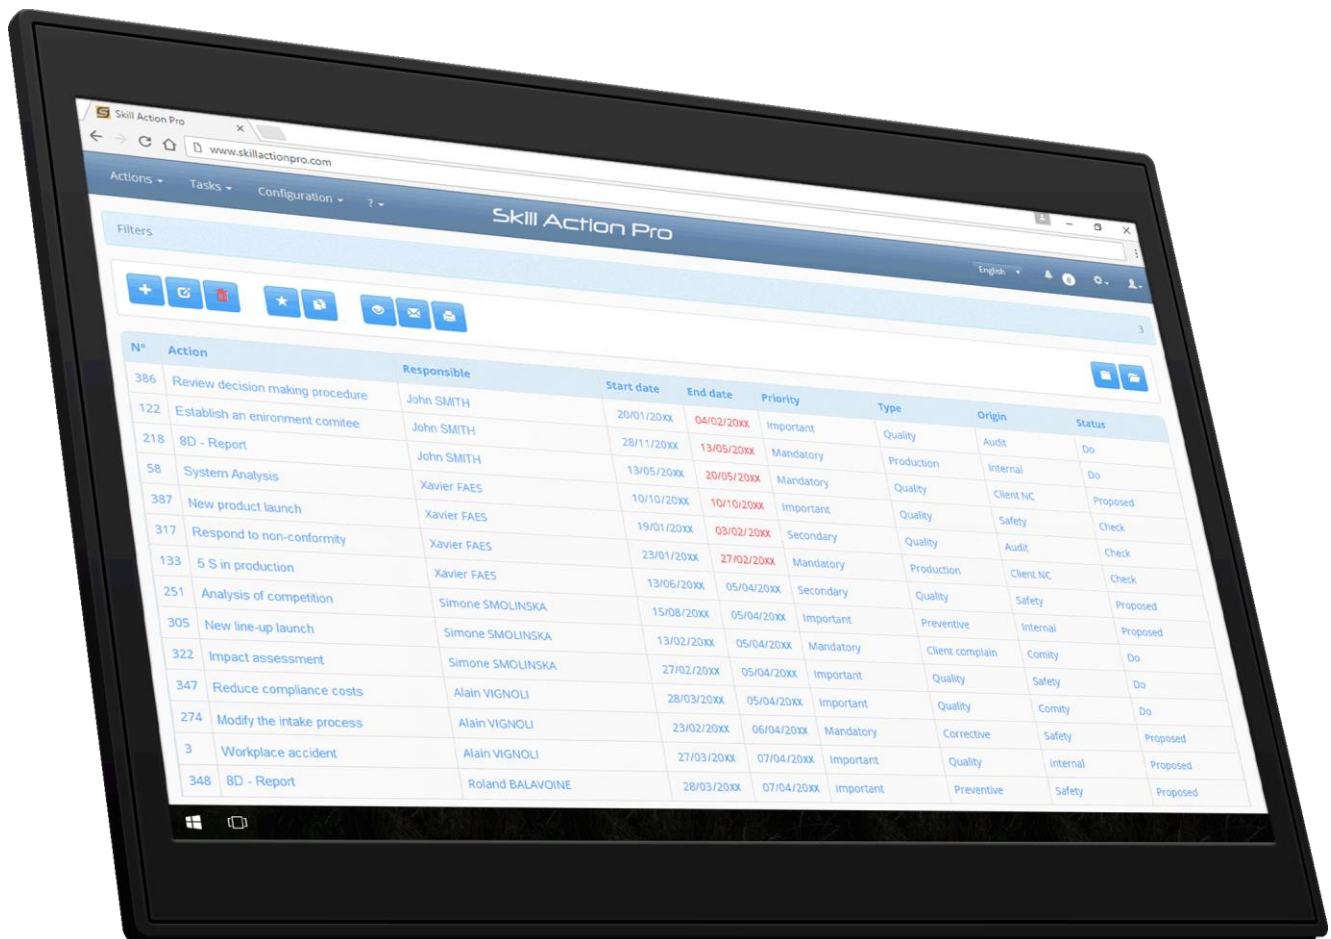

“**Skill Action Pro**” is dedicated to action plans. Our clients use this software to remove all Excel files and thus to have a global overview of their action plans through a user-friendly and secure web software.

CUSTOMERS: Our clients include many of the highest-performing industrial companies in the world, with the common goal of improving efficiency, quality and simplicity. A short list of our customers is available on our web site. The entire list can be required per mail

Skill Action Pro – simplicity and efficiency

SKILL ACTION PRO : All companies manage action plans. They generally use spreadsheets from 10 to 20 columns. It is impossible to have a global and safe vision when the information is stored in multiple files and spreadsheets duplicated each time you send a mail. Skill Action Pro is positioned between Excel, Outlook, Lotus Notes and hyper sophisticated programs involving a change of the whole organization. Skill Action Pro is a web software, simple, secured, and accessible by all users. It allows to centralize and process your actions in a reliable software without duplication.

WEB TECHNOLOGY of Skill Action Pro allows implementation from 1 to N sites easily. Due to its simplicity, Skill Action Pro is used directly and effectively by all users. As a result, a single screen for handling of actions and a performance analysis : Just one click!

SIMPLICITY AND EFFICIENCY: Skill Action Pro was developed hand in hand with our customers. The key word: simplicity! The web technology allows implementation from 1 to N sites easily. Due to its simplicity, Skill Action Pro is used directly and effectively by all users. As a result, a single screen for an action monitoring and a performance analysis. « Just one click » !

Global overview, mails and dashboard

GLOBAL / DETAILED OVERVIEW: The first screen displays a global overview of the actions. One click to zoom in on the user request. All actions are centralized, the software brings the right information on an intuitive interface. Unlike a spreadsheet Skill Action Pro simply displays the right information from the connection!

REMINDERS AND MAIL ALARMS: You can choose to be alerted automatically by mail: delays, new actions, or any other cadence. A manager can mobilize his teams on a specific project with a mouse click. Each email received is unique and opens Skill Action Pro to the right place. The right mail at the right time.

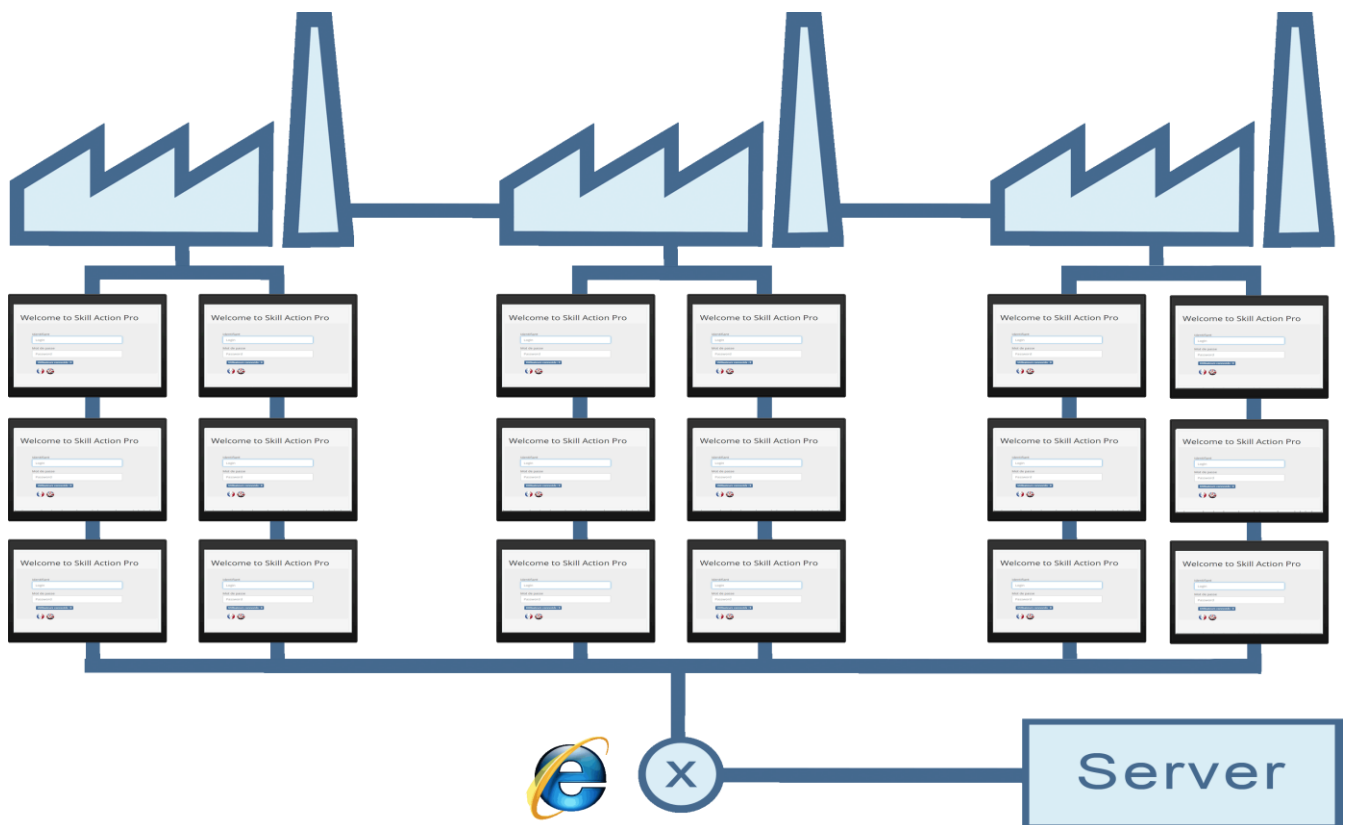

DASHBOARD AND PERFORMANCE: Skill Action Pro automatically generates your dashboard: actions distribution and performance. This screen is displayed in a graphical form and generates statistics for the monitoring of the actions. Real-time indicators.

Graphics and configurations

TRAFFIC AND WORKLOAD: The traffic is displayed graphically and compares the number of new actions to the number of acted ones. The workload shows you which person is available for a period of time. What is my workload? Who is available for this action?

MULTILINGUAL: The interface languages is in English or French. A module allows you to translate your data into multi-languages. Share and homogenize into multi-languages.

CONFIGURATIONS: Skill Action Pro a full web-based software accessible from any workstation with an internet connection. The software is either installed at the customer server or hosted by our company in SAAS mode. Configurations are available in a mono or multi-site network. Licenses are simultaneous. You can therefore install the software on N computers and only with X simultaneous connections. Ask for your online offer.
