

A defective
coffee machine,
out of toilet paper,
a broken lamp,...

Iris ensures **fast** and **simple** communication of facility failures so that they can be resolved as quickly as possible

FOCUS

The number of small interruptions is limited so that the Facility Manager/responsible for the management of the building has more time to focus on his core tasks.

EXPERTISE

Reports and analyses with valuable information (such as patterns concerning certain defects) are drawn up. As a result, the Facility Manager is better positioned to negotiate with suppliers.

SATISFACTION

The One Push Solution ensures that your customers and employees give the best of themselves in a carefree context.

EASY

With a simple push of a button the malfunction has been registered. We will solve your problem as soon as possible. This results in less downtime for machinery, sanitary facilities etc.

QUALITATIVE

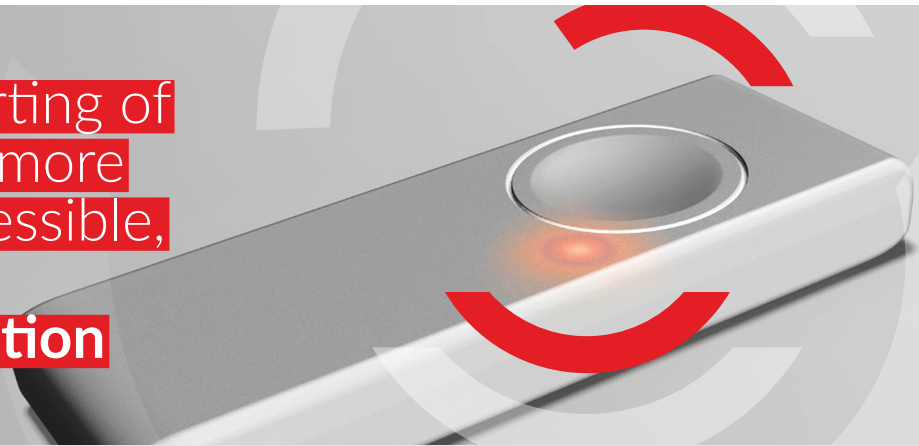

Malfunctions are reported more quickly, which increases the quality of the service.

FUNCTIONAL

The One Push Solution unburdens both the person responsible for the management of the building and the employees on the floor.

Make the reporting of
facility failures more
visible and accessible,
choose for the
One Push Solution

Thanks to our **One Push Solution**, the service is more quick and efficient

The system consists of an on-wall attachable box with one or five buttons. The function of these buttons is adjustable according to the malfunctions you want to communicate.

With a simple push of a button, you can report a malfunction. We will do our utmost to solve your problem as quickly as possible.
