

Net3 Technology

Veeam Cloud Backup

Key Highlights and Net3's Favorite Features

Veeam Cloud Backup is a robust solution that offers fast and flexible recovery for any size environment. From the enterprise to SMBs, Veeam's "always on" approach to data protection has proven to be very reliable. As a leading cloud services provider, here is a true assessment of what to expect when choosing Veeam Backup & Replication to the cloud.

HIGHLIGHTS OF VEEAM CLOUD BACKUP

Robust:

- Unlimited capacity for offsite data retention
- Leverage Object Storage/S3 for long term strategy for tiering of backups
- Customizable policies with backup schedule/frequency and retention rules
- Built in WAN accelerators for 50x faster backups

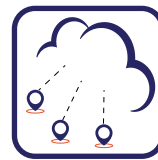

Secure:

- Secure On Site and Cloud backup storage
- AES-256 encryption of backups in transit and at rest
- Antivirus & intrusion prevention capabilities
- Automatically test & verify backups for recoverability

Fast Recovery:

- Rapid recovery from backup directly into Net3's PvDC Cloud
- Hosted self-service management portal
- Full image and file-level backups
- Initial seeding and large-scale recovery with physical shipping

Recovery Options:

- Wide range of recovery options: physical, virtual and cloud recovery
- Entire machines, single files and folders, databases, Office365 mailboxes, etc.
- Granular recovery with Veeam Explorers for Exchange, SQL, Active Directory, etc.

Veeam Cloud Backup with Net3

NET3 TECHNOLOGY'S FAVORITE FEATURES:

If you already own Veeam for onsite backup, it's as simple as 1 click to do cloud backup with Net3 Technology. Through the customer's Veeam console, just choose "Cloud Recovery" to start data backup to the cloud. No additional licenses necessary. Just pay for utilized storage in the cloud. Don't already own Veeam? No problem.

ORACLE®

Veeam is a very well-known backup product with over 80% of Fortune 500 companies trusting it as their backup solution. With complete control of your environment, it's great that you can make changes on the fly and test your backup plan at your convenience.

In the case of a DR "event", be up and running on site in under 24 hours. If you're looking for more business continuity, you have the convenience of spinning up your environment in Net3's cloud and run production.

If you have any questions about Veeam Cloud Backup and how to successfully implement it into your Data Protection plan, contact us at sales@n3t.com or Request More Info.

Net3 Technology is a cloud services provider offering nationwide backup and disaster recovery solutions tailored to fit company requirements with flexible pricing options.
