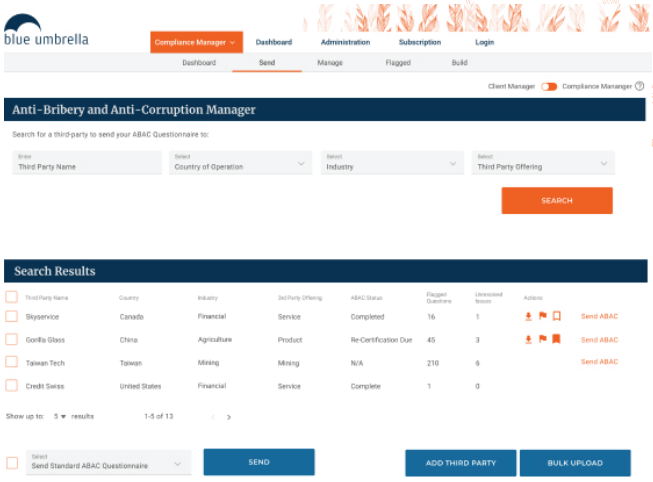
Blue Umbrella GRC

Anti-Bribery & Corruption

Risk Assessment Module

Trusted Provider

For over a decade, Blue Umbrella has specialized in providing highly specialized due diligence research and third-party compliance technology platforms to organizations of all sizes. Learn more about us here.



Get Started Now

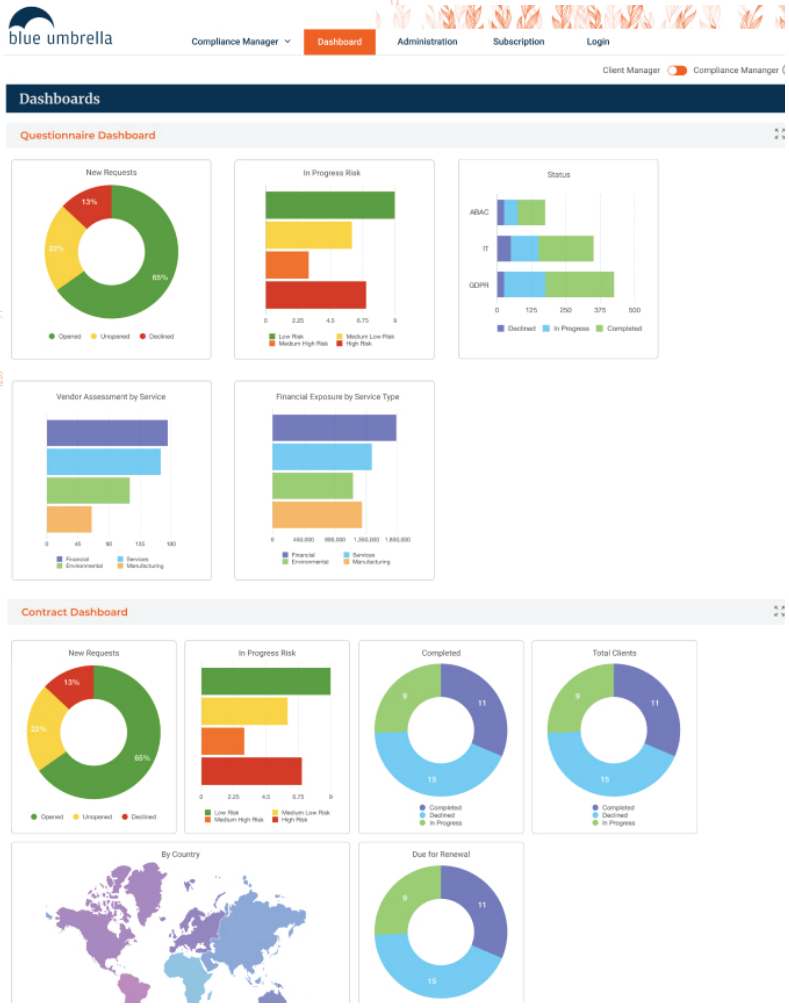
Deployed on a secure and user-friendly platform, Blue Umbrella GRC is a cloud-based technology built for organizations that are establishing or digitizing their third-party risk management program and are looking to drive collaboration across business units.

Best of all, our simple setup process means you can be up and running within minutes. Literally.

Industry Gold Standard

Blue Umbrella GRC's Anti-Bribery and Corruption (ABAC) module combines the best of both worlds – a gold standard risk assessment and an intuitive interface that automates your workflows and consolidates your third-party compliance data.

Our questionnaire provides a comprehensive assessment of the third party's ownership and management, government connections, compliance history, services offered and data protection measures to ensure that your organization is able to identify any gaps in your third party's policy, procedures, processes or documentation.



Integrated Workflows. Centralized Data.

Blue Umbrella GRC provides pre-defined workflows that simplify, centralize and reduce the complexity related to sending risk assessments, reviewing the results and flagging identified third-party ABAC risks. This ensures that your organization can establish and document remediating actions - all in one place.

Safe, Secure and Supported.

Blue Umbrella GRC leverages industry best practices to transmit, secure and store your data. Additionally, our client success team provides world-class support for when you have a question or need guidance.

Get Started Today

All it takes is a few minutes to sign up, enter your data and start managing your first risk assessment workflow. Reach out to us for a personalized demo or get started online.
