Blue Umbrella GRC
# California Consumer Privacy Act
Risk Assessment Module

Trusted Provider

For over a decade, Blue Umbrella has specialized in providing highly specialized due diligence research and third-party compliance technology platforms to organizations of all sizes. Learn more about us here.

Get Started or Optimize.

Deployed on a secure and user-friendly platform, Blue Umbrella GRC is a cloud-based technology built for organizations that are establishing or digitizing their third-party risk management program and are looking to drive collaboration across business units.

Best of all, our simple setup process means you can be up and running within minutes. Literally.

Trust the Gold Standard

Blue Umbrella GRC's California Consumer Privacy Act Module combines the best of both worlds – a CCPA risk assessment and an intuitive interface that automates your workflows and consolidates your third-party compliance data.

The Blue Umbrella CCPA risk assessment questionnaire addresses key requirements to ensure that you have insight into your third party's policy, procedures, systems and documentation to help identify any CCPA-related risks.

Focus on key risk areas such as personal information collection, information use, disclosure obligations, resident rights, right of deletion, opt-out, authentication and privacy & data security practices.
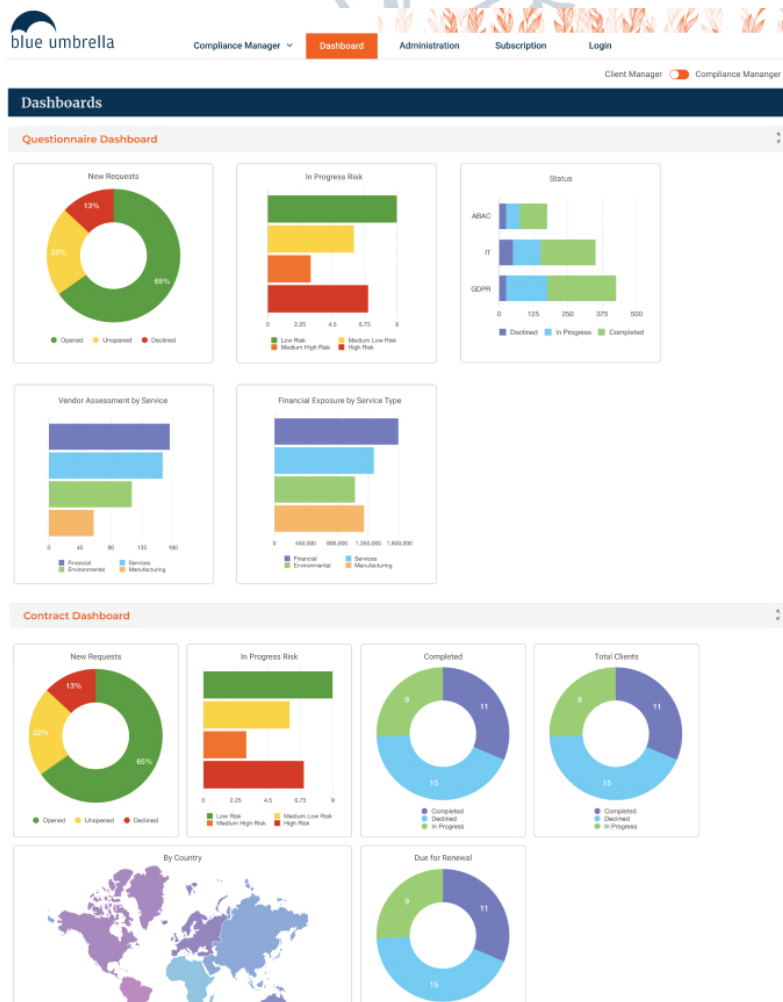

Integrated Workflows. Centralized Data.

Blue Umbrella GRC provides pre-defined workflows that simplify, centralize and reduce the complexity related to sending risk assessments, reviewing the results and flagging identified third-party ABAC risks. This ensures that your organization can establish and document remediating actions - *all in one place*.

Safe, Secure and Supported.

Blue Umbrella GRC leverages industry best practices to transmit, secure and store your data. Additionally, our client success team provides world-class support for when you have a question or need guidance.

About Blue Umbrella
