

How to Properly Clean Horizon Touch Screens

Use just enough isopropyl alcohol on a lint-free cloth to wipe down the screens, clean with light pressure

Leave no moisture behind (if moisture penetrates the touch membrane, the screen will be damaged)

Never use an abraisve rag, sponge or commercial wipes

Do not use any commercial spray cleaning products and disinfectant wipes

If you have additional questions about sanitizing machines, please contact Joe Hillman, Standard Dynamics, at (952) 888-7332.
