## Morizzom

## CUTTING AND CREASING <br> SmartSifiter

Crease, Perforate, and Cut in One Pass.

## SHEET CUTTING, CREASING, AND PERFORATING IN ONE PASS.

A quality finishing process for digitally printed sheets.

## BENEFIT

## LABOR SAVING

The creasing, perforating and sheet cutting can be performed in one pass for various applications such as business cards, shop cards, invitation cards, greeting cards, laminated sheets, and covers for perfect binding.
APPLICATION FLEXIBILITY
The SMSL-PR optional perforation cassette enables skip perforation for various applications such as coupons, tickets and checks.

USER-FRIENDLY OPERATION
New high resolution color touch screen display for easy and intuitive operation.

## HIGHEST PRECISION

The camera device detects the print registration by reading the barcode or mark printed on the sheet. The position of the slitter, creaser, and cutting position are adjusted according to image shift.
MANAGE YOUR BINDERY WITH PXNET System can be enhanced with JDF workflow from upstream to postpress using the Horizon pXnet Bindery Control System

## KEY FEATURES.

The SmartSlitter performs various finishing styles in a single pass including cutting, creasing and perforating.

## DETAILS FOR EACH DEVICE.

From start to finish.

1 operation console
Changeovers including sheet size, imposition, cutting positio and processing type (creasing or perforating) can be done easily at the newly equipped high resolution touchscreen memory for easy recall.

## 

## 2 feed section

3 TRANSPORT SECTION
The sheets will be aligned via the vacuum registration system camera device detects the print registration by reading the barcode or mark printed on barcode or mark printed on
the sheet. The position of the slitter, creaser, and cutting position a adjusted according to image shift

# 4 Impact creasing section 

Up to 20 creasing lines can be made with the standard equipped creasing unit. The lines can be made in one pass. The creasing depth can be The creasing depth can be
adjusted according to the she adjusted according to the sheet
thickness. The creasing interval can be adjusted by 0.1 mm or $0.004^{\prime \prime}$.

5 ROTARY PERFORATION ROTARY CREASING SECTION

## OPTIONS.

Performance Enhancing Options ausing can be performed by the pre-set number set at the touch screen single cut or bleed/gutter cut is possible.

## 8 STACK TRAY

Processed sheets are delivered on the tray

$\qquad$ erforation cassette or the SMSL-CR rotary creasing Cassette according to th applications.
asseteremoval designed for easy maintenance.

6 SLITTER SECTION

stackere small produt such as business cards or greeting cards. Stacker tray can stack up to 90 mm or .54" height.

## OPTIONS.

Performance Enhancing Options.

## | PRF-36 IMPACT PERFORATION UNIT

- Perforation lines can be made in the width direction by replacing the first creasing unit with the optional PRF-36.

## | IMPACT CREASING UNIT

- Different widths of creasing lines are available using this unit:

Standard width is 0.8 mm or $0.031^{\prime \prime}$
0.5 mm or $0.020^{\prime \prime}$ (thin)
1.3 mm or $0.512^{\prime \prime}$ (thick)
2.0 mm or $0.079^{\prime \prime}$ (thick)

## | SMSL-CA CAMERA DEVICE

- This camera reads the print registration mark or barcode to adjust the utting, perforating and creasing position according to image positio This camera is also used to read the barcode for automatic job set-up.
| SMSL-PR ROTARY PERFORATION CASSETTE
- Perforation is performed in the direction of paper feeding.
- Two rotary perforation units are equipped. Skip perforation can be performed.

## | SMSL-CR ROTARY CREASING CASSETTE

- Creasing is performed in the direction of paper feeding - Two rotary creasing units are equipped.
