Websites or content must not contain or cause the download of any spyware, malware or software, resulting in an unexpected experience, such as the automatic download of applications without users' consent.

1.4 CREATIVE

Every advertising unit consists of a title and a thumbnail image.

An advertising unit (ad unit) is a coherent medium that sells or promotes a product, service or idea. Together bold visuals and strong titles drive better customer engagement & increase click through rates (CTR).

On the other hand, a misleading or unclear message of an ad unit may worsen user satisfaction & increase the bounce rate of a website. Therefore, every ad unit should target its audience and give users a clear understanding of what is on the landing page.

The thumbnail image is the key element to an ad unit as it draws the user's eye and keeps their attention. However, make sure that the advertised content is tailored to the product/service you promote.

LOCALIZATION

Ad unit design directly depends on the promoted content. This means to get creatives localized, the provided publications should contain localized tone of materials on the page.

Indonesia is a vastly diverse country with a great amount of regional, religious, linguistic, culinary, social and cultural differences. In your selection of images, try to incorporate cultural features that resonate with the targeted audience. Anything mirroring everyday/local life of the country/region would be something the audience can immediately relate to.

MGID provides content distribution within multiple categories and rankings. This allows ad units to meet the requirements for the particular web properties they are displayed on.

Ad units are moderated separately. The category and ranking depend on the actual design of each particular ad unit (e.g. two different categories can be applied for the same product).

A high rating and credibility is a must.

Content on both landing page and offer page should be appropriate for the general audience, informative and of a high value.

Cloaking refers to the practice of presenting different content or URLs to users than to MGID moderation. It is used to hide the true destination that users are directed to. When it is detected by the system, the moderator blocks ads and notifies the account manager by email.

PHISHING

You must not use websites that are designed to collect a user's personal information or harvest personal information with the intention of distributing that information without a user's consent. Personal information includes: credit card numbers, email addresses, dates of birth, telephone numbers, sexual orientation and gender.

BROWSER LOCKING

Refers to the practice when the system identifies a popup is preventing the user from exiting the browser.

You must not interfere in any manner with a user's ability to return to the original referring website by clicking back on their browser.

DRIVE BY DOWNLOAD

Refers to a practice when a file download starts automatically when the ad is displayed without any user action. Websites or content must not contain or cause the download of any spyware, malware or software, resulting in an unexpected experience, such as the automatic download of applications without users' consent.

2.4 CREATIVE

Every advertising unit consists of a title and a thumbnail image. An advertising unit (ad unit) is a coherent medium that sells or promotes a product, service or idea. Together bold visuals and strong titles drive better customer engagement & increase click through rates (CTR).

On the other hand, a misleading or unclear message of an ad unit may worsen user satisfaction & increase the bounce rate of a website. Therefore, every ad unit should target its audience and give users a clear understanding of what is on the landing page.

The thumbnail image is the key element to an ad unit as it draws the user's eye and keeps their attention. However, make sure that the advertised content is tailored to the product/service you promote

MGID uses an automated cropping solution to tailor each image to customized placement sizes across all partners websites. Therefore, a landscape-oriented image with an aspect ratio of 16:9 or 1:1 is best practice.

Some other tips to make sure your image is cropped correctly:

- Choose an image with a clear, single point of focus and a relatively plain background. Avoid images with multiple subjects or busy backgrounds to avoid anything vital being cropped out of the image.

Note the way this image gets cut off in a 4:3 thumbnail.

- Avoid images with small text

Note the way this image gets cut off in a 1:1 thumbnail.

- Avoid images that include brand logos or layers of text. These may not crop well and end up being off-center.

Note the way the text is cut off in a 2:1 and 1:1 placement

- Avoid images that include text in the corner
