The situation in Italy

Our compassion and sympathy are with those that have lost loved ones.
We want to update you on the situation at EXOR International.
While some people and goods associated with production in Italy must close until the 3rd April, EXOR International is listed as one of the "essential" industries given that Our Technology is used in sectors such as water treatment, production of food as well as medical equipment manufacturers amongst others...

ARTICLES

### The Role of Industrial Cloud Computing Technology in Industrial Automation Systems

The introduction of automated systems within industrial facilities and operations spearheaded the increase in productivity and accuracy manufacturers currently benefit from. For example, the manual installation of pistons in automobiles witnessed a reduced error rate from 1.5% to approximately 0.00001% when automation was applied.

Industrial Edge Computing Hardware: the Key to Industrial Cloud Adoption

The complete automation of industrial processes relies on connectivity. For the Internet of Things (IoT) to function without downtime, low latency communications must be achievable to ensure that interconnected networks function both online and offline.

WEBSITE IMPROVEMENTS

Online Catalog

To assist our network in communicating the technology of EXOR remotely to our customers, we have developed an online brochure which includes a specification filter. While sharing screens via any of the many video conferencing systems available, our network can discuss the customer's problem that EXOR technology can resolve.
