## A better solution for PP&E lease management:

Property Lease Management (PLM) is a directly embedded solution for Dynamics 365 Business Central. It includes a comprehensive set of tools needed to manage your properties while enabling compliance with ASC 842 and IFRS 16; and simplifies both lessor and lessee accounting processes.

Aside from the lease processing and administration, Property Lease Management also excels at building detailed vacancy and delinquency reports, rent roll reports, and lease summary reports that help companies improve their analysis and forecasting leading to better business decisions.

\* All prices are per user. Minimum 3 users per tenant
