

SNP Receives Additional Certifications for Information Security

- TÜV Süd confirms globally recognized standards at SNP for the protection of confidential information
- SNP receives the ISO/IEC 27001 seal of approval – a standard for information security – and passes the TISAX audit according to the specifications of the automotive industry

Heidelberg, August 31, 2020 – SNP SE, a world-leading provider of software for digital transformation processes, has received certification for [ISO/IEC 27001](#) from TÜV Süd. With the seal of approval, the independent certification body confirms that SNP has an information security management system and applies globally recognized standards for the protection of data and information. In addition, SNP has passed [TISAX*](#) (Trusted Information Security Assessment Exchange) assessment – a standard for information security specifically defined by the German Association of the Automotive Industry.

The ISO/IEC 27001 standard defines requirements for an effective information security management system that forms the structural basis for handling confidential information responsibly. In addition to the new ISO seal of approval for information security, SNP already has other certifications, including a quality management system certified according to ISO 9001. Furthermore, the SNP Poland data centers are certified according to ISO 27018.

“For SNP, information security has always been and remains a central aspect and basis for our actions,” says Prof. Dr. Herbert Schuster, Chief Information Officer (CIO) of SNP. “The new certifications demonstrate that our information security measures are successful and justify the trust placed in us as a reliable partner for customers, suppliers and our employees. SNP guarantees confidentiality, availability and integrity of information and systems for all stakeholders at all times. This confirmation from an independent body motivates us to continue making consistent progress along our path.”

About SNP

SNP is a world-leading provider of software for managing complex digital transformation processes. Instead of traditional IT consulting in the ERP environment, SNP offers an automated approach using specially developed software: The Business Transformation Platform CrystalBridge® and the SNP BLUEFIELD™ approach allow companies to restructure and modernize their IT landscapes much more quickly and securely as well as migrate to new systems or cloud environments more securely. This gives customers clear qualitative advantages while at the same time reducing their time and costs.

The SNP Group has around 1,400 employees worldwide. The company is headquartered in Heidelberg, Germany, and generated revenue of around EUR 145 million in the 2019 fiscal year. It serves multinational companies in all industries. SNP was established in 1994, went public in 2000, and has been listed in the Prime Standard segment of the Frankfurt Stock Exchange since August 2014 (ISIN DE0007203705) and was admitted to the SDAX in March 2020. Since 2017, the company has been trading as a European company (Societas Europaea/SE).
