SNP Offers Automated Solution Package for Moving to the Cloud

- **Cloud migration package enables fast and secure migration of SAP landscapes to the cloud with SNP software CrystalBridge®**
- **Customers benefit from highly reliable planning due to fixed price**
- **Package includes all necessary software licenses and consulting expenses**

Singapore, May 3, 2021 – SNP Schneider-Neureither & Partner SE, a world-leading provider of software solutions for digital transformation processes and automated data migrations, has developed a new solution package for moving SAP landscapes to the cloud in a simple and predictable manner. The cloud migration package is based on the data transformation platform CrystalBridge®, which automates the migration of SAP systems to the cloud, therefore providing a fast and secure move. The package includes all costs that are necessary for a successful data migration – software licenses and consulting services – and the fixed price ensures highly reliable planning. In addition, the package enables a particularly fast move to the cloud thanks to SNP's flexible, software-based approach: Depending on the complexity and requirements, the time between the performing the assessment and gaining access to the migrated SAP systems in the cloud is often less than six months.

The cloud migration package is designed to map most diverse scenarios even with varying complexities. The package enables a 1:1 migration of SAP landscapes to the cloud ("lift and shift") along with the necessary SAP upgrades of the ECC systems, operating system and database changes, and even Unicode conversions. The add-ons offered are a selective data migration to the cloud and a migration to SAP S/4HANA in a cloud environment, respectively. In addition, companies have the option to add downtime optimization and the creation of a proof of concept for a test system. If additional functions are required, the package can be supplemented

with further services and software modules from SNP. The offer is aimed at both direct customers and partner companies, which can include the package in their offerings.

“Our end-to-end cloud migration package enables customers and partners to move to the cloud quickly, securely and in a highly automated manner with CrystalBridge®,” says Gerald Faust, Managing Director & CEO, JAPAC, SNP Transformations SEA Pte Ltd. “We are confident that our fixed price package is the ideal solution for every SAP customer in the Asia Pacific Japan and Middle East region as it reduces complexity and enables delivering high business performance at the same time: customers benefit from highly reliable planning and won’t experience any unpleasant surprises during the migration project. With that companies get exactly the security they need to take the step into the cloud and the next step in order to become an intelligent enterprise.”

“Our primary goal in developing the cloud migration package was to provide customers and partners with simplified and risk-free approach” adds Tarik Husain, Vice President, Strategic Sales, JAPAC, SNP Transformations SEA Pte Ltd. “Partners can seamlessly integrate this package into their own offerings to provide users with an optimal end-to-end solution. At the same time, customers can see clear benefits from our unique approach. Many want to go to cloud but are concerned about risk, what interfaces they have, project timelines and even what the real cost benefits are. Our approach overcomes all these challenges. This provides a clear and simple path for moving to the cloud.”

About SNP

SNP is a world-leading provider of software for managing complex digital transformation processes. Instead of traditional IT consulting in the ERP environment, SNP offers an automated approach using specially developed software: The Data Transformation Platform CrystalBridge® and the SNP BLUEFIELD™ approach allow companies to restructure and modernize their IT landscapes much more quickly and securely as well as migrate to new systems or cloud environments more securely. This gives customers clear qualitative advantages while at the same time reducing their time and costs.

The SNP Group has around 1,400 employees worldwide. The company is headquartered in Heidelberg, Germany, and generated revenues of around EUR 143 million in the 2020 fiscal year. It serves multinational companies in all industries. SNP was established in 1994, went public in 2000, and has been listed in the Prime Standard segment of the Frankfurt Stock Exchange since August 2014 (ISIN DE0007203705). Since 2017, the company has been trading as a European company (Societas Europaea/SE).
