

## CASE STUDY

# ENHANCING SAFETY TRAINING WITH INTUTO

When Besafe Training Ltd were looking to develop and grow their online training offerings, Intuto's simplicity made them an attractive choice.

### Background

**Besafe Training Ltd is a New Zealand owned and operated Private Training Establishment (PTE), offering a wide range of health and safety, NZQA registered courses.**

Besafe Training Ltd is a Category 1 training provider, which means NZQA is Highly Confident of their capability in educational performance and self-assessment.

Besafe trainers are experts in their field of training and ensure a positive relationship with course participants. They have a wide range of expertise including emergency services, the building industry, confined space work and working at heights.

### The Challenge

We were looking to develop and grow our online training offerings and upon discovering Intuto, I was attracted to the simplicity it offered in the development and implementation.

**intuto.com**

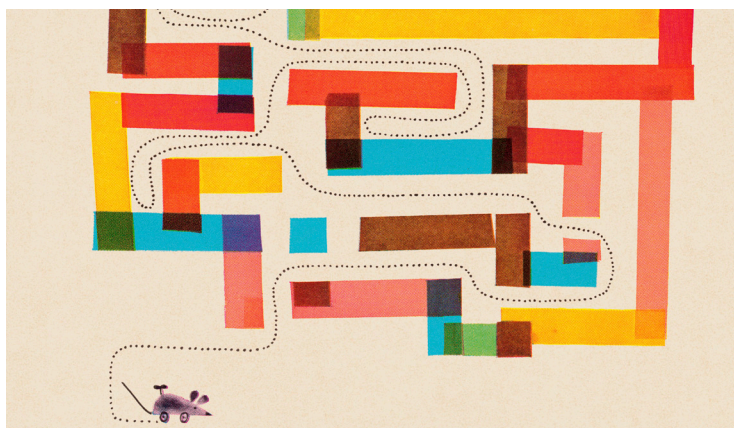

Intuto, the training platform of choice  
for 1000's of people each year.

## Solution

After providing initial training and loading first content, Intuto took a back seat, leaving Besafe Training Ltd to create their own courses with little need for further help.

Favourite Intuto features include:

- the Content Editor, which is simple and intuitive for users from any background to create elegant and interactive content
- Intuto's Tracking / Reporting function, which allows site owners to see how users are progressing through their courses
- Checkpoints, multiple choice quizzes that you can track, set a pass mark for or limit the number of attempts

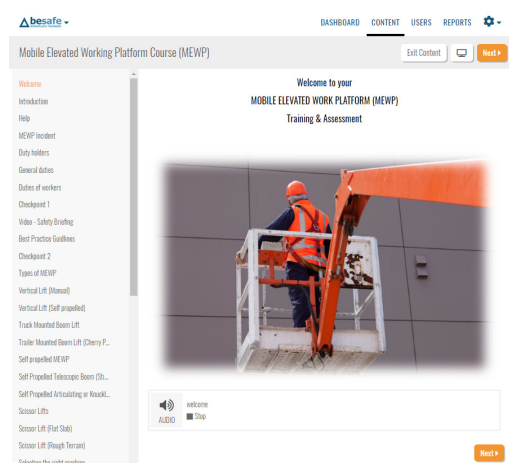

## Results

- Intuto has helped Besafe Training Ltd to grow their online courses
- Increased efficiency, as online training saves time
- Increase revenue and increased the value of their offerings
- Intuto has helped Besafe to maintain compliance in Health and Safety and other areas
