#### How has Intuto Improved your business?

By allowing us to create our own relevant, relatable training programmes for our staff. The Intuto portal is also used to monitor who is or has been trained in certain areas. This reporting is vital to health and safety requirements of our industry. Our training does not stop at health and safety issues, we also use it for training new staff, refresher training, contractor inductions and to improve our services to our customers.

We have a diverse educational and cultural background with the employees in our business, and the training modules are easy to navigate, eye catching and professional.

#### Intuto helps me ...

Save money

Increase revenue

W Be more productive

W Be consistent

Track and improve training

Maintain compliance in

W Health & Safety or other areas

Make training easy for my staff

Other: Performance manage

## Would you recommend Intuto to other business?

Want to find out more?

To find out more about Bidfood Rotorua go to www.bidfood.co.nz

#### Would you like to add anything else?

Businesses that have a high staff turnover would realy benefit from this. Our branch here has a very low turnover, but I could see this type of training being an asset, because it is self directed training, you don't need to micro-manage the trainees during the process.

The learning is measurable, with the inclusion of the check points.
