

EXPAND. EXCEED. XCELERATE

Additive manufacturing has been changing the world of manufacturing, and will continue doing so at a rapid pace. To stay competitive, organizations need to learn about these changes quickly and adopt their operations. Siemens' Additive Manufacturing Network brings the knowledge and expertise of the industrial AM ecosystem to help your organization take full advantage of AM.

PART BUYERS

- Validate your AM design
- Collaborate with your experts and suppliers
- Manage and track orders

PART SUPPLIERS

- Dynamically analyze costs, and automate quotes
- Plan and schedule your resources
- Monitor order status

ENGINEERING CONSULTANCY

- Make your services accessible to your customers
- Manage and track projects
- Streamline communication with your customers

SOFTWARE VENDOR

- Leverage the open APIs and services to integrate your apps
- Access AM Network customers via Siemens' app store
- Provide an integrated experience

MATERIAL VENDOR

- Promote your material capabilities and specifications
- Commercialize your process and material know-how
- Protect your IP with the AM network digital tools

MACHINE VENDOR

- Make your technology accessible for designers
- Streamline jobs to machines
- Advanced analytics of machine network

There's only one way to realize the full potential of **Additive Manufacturing** and that starts with the **Siemens' AM Network** and its members.
