

# Superhuman Vision™

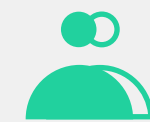

## for Internet to Print Services

Our next-gen AI-powered computer vision changes the way you work with images. Turn vision into value and actionable insights that help you better understand customers, improve their buying experience, and increase sales.

### Actionable consumer insights

Helping you understand your users and their content better.

### Improve customer satisfaction

Automatically selecting the best pictures for great results and a simplified order experience.

### Minimize shopping cart abandonment

Help customers cut through the digital clutter by simplifying the content selection process.

### Increase average ticket

Suggesting personalized upsell opportunities like additional formats, materials, or seasonal promotions.

### FLAT RATE

Process as many photos as needed with our flat rate price model.

### SDK

Goes where the data is – kiosks, devices, or servers – and ensures total privacy.

Trusted by:

The leading German stock photo and media company leverages Mobius Labs' image tagging solution to provide instant recommendations on the best photographs for printing.
