# Superhuman Vision™ for Asset Management

AI-powered technology that revolutionizes how the world works with visual content.

### AI-POWERED ASSET MANAGEMENT

—

Instantly categorize visual content as it is uploaded to your platform, making it quickly searchable via intuitive AI models.

### ABSOLUTE CONTENT PROTECTION

—

Keep your data securely with you: our SDK installs directly in your systems giving you unparalleled privacy and speed.

### SUPER EASY TO INTEGRATE

—

We seamlessly integrate with asset management platforms around the world. Our solutions are easy to install and designed for anyone to use.

### STREAMLINED PRODUCTIVITY

—

Prioritize your visual content to accelerate workflows and reduce content search times.

# What can Mobius Labs do for you?

## Automatic Image and Video Keywording

Our AI analyzes new images and videos with human-like perception and automatically tags them with precise keywords.

## Similarity Analysis to Find Related Assets

Stop spending a huge amount of time looking for the right visual assets.

## Score Content with Aesthetic Ranking

Our solution learns your visual style to bring your best assets to the forefront while sorting out the undesirable.

## Facial Recognition and Demographic Analysis

Search for specific people and demographics in both images and videos. Anyone can be added to your database using only a single portrait.

## Trained on Little Data, Requiring No Expertise

Train new models using very little amounts of your own data in order to suit specific business needs.

## An SDK with Unparalleled Speed and Efficiency

Our models are as small as 5Mb and can be installed directly on hardware with no network connection required; objects are detected at 52ms per image.
