

Superhuman Vision™ for Asset Management

AI-powered technology that revolutionizes how the world works with visual content.

AI-POWERED ASSET MANAGEMENT

Instantly categorize visual content as it is uploaded to your platform, making it quickly searchable via intuitive AI models.

SUPER EASY TO INTEGRATE

We seamlessly integrate with asset management platforms around the world. Our solutions are easy to install and designed for anyone to use.

ABSOLUTE CONTENT PROTECTION

Keep your data securely with you: our SDK installs directly in your systems giving you unparalleled privacy and speed.

STREAMLINED PRODUCTIVITY

Prioritize your visual content to accelerate workflows and reduce content search times.

What can Mobius Labs do for you?

Automatic Image and Video Keywording

Our AI analyzes new images and videos with human-like perception and automatically tags them with precise keywords.

Facial Recognition and Demographic Analysis

Search for specific people and demographics in both images and videos. Anyone can be added to your database using only a single portrait.

Similarity Analysis to Find Related Assets

Stop spending a huge amount of time looking for the right visual assets.

Trained on Little Data, Requiring No Expertise

Train new models using very little amounts of your own data in order to suit specific business needs.

Score Content with Aesthetic Ranking

Our solution learns your visual style to bring your best assets to the forefront while sorting out the undesirable.

An SDK with Unparalleled Speed and Efficiency

Our models are as small as 5Mb and can be installed directly on hardware with no network connection required; objects are detected at 52ms per image.

It's not just computer vision anymore, it's **Superhuman Vision™**

A new generation of AI-powered computer vision that is disrupting how the world works with visual content.

VISION IS A SUPERPOWER™
