

# Jewish Community Center North Shore

*Committed to being the central gathering place for Jewish life, learning and culture on the North Shore*

## At a glance

The Jewish Community Center of the North Shore is committed to being the central gathering place for Jewish life, learning, and culture on the North Shore; offering enriching experiences to strengthen Jewish identity and connection to the state of Israel; enhancing all members' social, physical, educational and spiritual lives; and strengthening their relationship with the community at large.

## JCC North Shore Commitment to Safety

The JCCNS is an award-winning community center welcoming families from across the North Shore. They offer enriching programs and services for everyone in the family. As such, safety is top of mind for the organization.

## CHALLENGES

With the significant rise in targeted violence against houses of worship across the United States, JCC North Shore has consistently worked to implement solutions to keep their community members safe. With special consideration for protecting the children, and following the Tree of Life shooting in Pittsburgh, the JCC began to look for crisis response solutions.

## JFK NORTH CAMPUS SOLUTION

Implementing Critical Incident Response Technology throughout the facility to quickly notify security and/or law enforcement of an incident, along with the address and location within the building.

Critical Incident

Press a Button

Help Enroute

## BENEFITS

- 1 Incident is Reported Immediately**  
When immediate action is needed to tend to the situation, the process must be simple and concise. This significantly reduces response time from Security and Law Enforcement while also notifying all those under attack within the organization and building.
- 2 Communication is Clear and Redundant**  
Reliable and redundant methods of alerting persons who are in danger, as well as providing the fastest notification to security and law enforcement by communicating directly with police and security dispatch.
- 3 Saving Time Saves Lives**  
The approach focuses specifically on accelerating notification time to and expedited response from law enforcement and crisis first responders. Responders know what is happening, where it is happening, who it is happening to and help is on the way immediately.
