## CHALLENGES

With the significant rise in workplace violence incidents in healthcare settings across the United States, JFK Medical Center North was seeking to become a market leader in employee and patient safety, Fast and accurate communication during crisis events was key to achieving this goal

## JFK NORTH CAMPUS SOLUTION

Implementing Critical Incident Response Technology throughout the North Campus Facility to quickly notify security and/or law enforcement of an incident, along with the address and location within the building.

**Critical Incident**

**Press a Button**

**Help Enroute**

## BENEFITS

**1**

### Incident is Reported Immediately

When immediate action is needed to tend to the situation, the process must be simple and concise. This significantly reduces response time from Security and Law Enforcement while also notifying all those under attack within the organization and building.

**2**

### Communication is Clear and Redundant

Reliable and redundant methods of alerting persons who are in danger, as well as providing the fastest notification to security and law enforcement by communicating directly with police and security dispatch.

**3**

### Saving Time Saves Lives

The approach focuses specifically on accelerating notification time to and expedited response from law enforcement and crisis first responders. Responders know what is happening, where it is happening, who it is happening to and help is on the way immediately.
