# CLOUD CENTER OF EXCELLENCE

A Cloud Center of Excellence (COE) provides multi/hybrid Cloud management and automation, DevOps, Site Reliability Engineering (SRE), CloudOps, and application migration and management.

One CoE to manage all Cloud needs and challenges

As enterprises implement increasingly complex Cloud solutions across multiple private and public Cloud-based technologies—providing the desired operational environments to drive business outcomes has become increasingly difficult. Leveraging industry-leading expertise in managing Cloud technology environments, you can focus on getting the maximum business value out of your Cloud infrastructure.

Mastech InfoTrellis is a leading and trusted partner to manage and take care of these complex Cloud operational environments for enterprises across multiple industries. We offer several Cloud CoE Services and Solutions to operate and manage a range of complex Cloud technology solutions and environments.

Cloud infrastructure and application development

Multi and Hybrid Cloud Management and Automation

We provide an ongoing Managed Service to help clients manage Cloud environments and Cloud applications using best practices in Site Reliability Engineering (SRE), focusing on HADR, security, tools, and processes.

DevOps and Site Reliability Engineering (SRE) Support

These move to Cloud services help assess the current Cloud strategy of an enterprise and enable Cloud integration and networking, including DevOps and CloudOps support.

Managed Cloud software solutions

Cloud Management Solution Support

Cloud Management Solution Support provides ongoing management and support of software solutions in various Cloud environments. With a comprehensive service offering, it takes care of setup and configuration to meet business value demands.

Cloud Management Operational Support

Cloud Management Operational Support provides ongoing management of infrastructure and security for solution environments. It takes care of provisioning, setup, and configuration, including hardening. The 24x7 monitoring, administration, and maintenance help the enterprise meet business continuity demands.

Cloud Application Workload Transformation, Maintenance, and Management

Cloud Application Transformation, Maintenance, and Management provide a set of services that empowers clients to take existing workloads, re-platform them to a container-based Cloud architecture and offload the maintenance and management of the applications.

Mastech InfoTrellis not only implements the application but also provides long-term infrastructure, database, and application support. We monitor the system's health every day, and our support staff helps optimize performance, data quality, and user satisfaction.

Call us today to learn about our Cloud Center of Excellence and make your Cloud environment sustainable.
