

GCI APPLICATIONS SUITES

Life Sciences Suite

For Life Sciences customers who need a reference architecture that addresses change request, reporting, controlled printing and impact assessment. Some professional services required to tailor to the customer's final specifications. This suite includes:

- GCI Power Tools for Workflow
- GCI Power Tools for Reports & Views
- GCI Power Tools for Documents
- GCI Power Tools Viewer
- GCI Power Tools for OpenText Electronic Signatures and the GCI Life Sciences Reference Architecture

Regulated Industries Suite

For customers already using Content Server in regulated industries, this suite enables the creation of full-featured document control processes, multi-document OpenText electronic signatures, and custom reporting on these controlled workflows. This suite includes:

- GCI Power Tools for Workflow
- GCI Power Tools for Reports & Views
- GCI Power Tools for OpenText Electronic Signatures

Enhanced Workflow & Reporting Suite

For customers who need to extend their Content Server workflow and reporting capabilities. This suite includes:

- GCI Power Tools for Workflow
- GCI Power Tools for Reports & Views

Document Processing & Viewing Suite

For customers who wish to create their own document processes within Content Server, including metadata integration, merging of documents, conversion to PDF or Word, watermarking digital signatures, and viewing and annotating common Office and CAD formatted documents directly within Content Server's web interface. This suite includes:

- GCI Power Tools for Documents
- GCI Power Tools Viewer

Advanced Content Administration Suite

The most complete solution for moving content including users & groups, documents, folder taxonomies, workflow maps, categories & attributes, and more, among your Content Server instances, and extracting and pre-processing defined collections of documents and metadata from Content Server for distribution to clients, regulators, and other stakeholders. This suite includes:

- GCI Power Tools for Deployments
- GCI Power Tools for Content Export

Workflow and Metadata Archiving Suite

Addresses critical database, performance and legal issues surrounding completed workflows and audit trail metadata. This suite includes:

- GCI Power Tools for Archiving core module and Completed Workflows and Audit Trail metadata sub-modules
