GCI POWERTOOLS SUITE FOR OPENTEXT CONTENT SUITE & EXTENDED ECM PLATFORMS

GCI PowerTools provides business critical solution extensions to the OpenText Content Suite and Extended ECM Platforms. Designed to help organizations increase the delivery speed of products and services, improving regulatory compliance, and reducing operational costs.

With our customers, we achieve these results by redesigning, optimizing, and automating business processes; minimizing regulatory compliance risks; eliminating manual errors, and reducing the time required to recognize revenue.

Increase throughput of complex document-centric processes

Consistent and auditable application of business processes

Increase cash for critical investments by reducing TCO and DSO

GCI — PTAC — GCI POWERTOOLS ACCESS CONTROL

Eliminate the expense of failing a compliance audit by enabling Administrators to remain compliant with Content Suite read-only licenses, controlling the level of access for users and groups.

GCI — PTW — GCI POWERTOOLS WORKFLOW

Increase the automation of complex, document-centric workflow processes resulting in reduced costs and improved compliance, and auditability by providing hundreds of features to Content Suite workflows, transforming it to a 'no code', future proof business process management engine.

GCI — PTD — GCI POWERTOOLS DEPLOYMENTS

Reduce the costs, simplifies regulatory compliance, and reduce errors associated with moving Content Suite information and module settings from one environment to another during consolidations/mergers, divestitures, and controlled change management.

GCI — PTfD — GCI POWERTOOLS DOCUMENTS

Reduce the time and effort required to produce complex business documents; automating document compilation, transformation and publication; adding styling, formatting, structure, signing, and converting to standard file formats like PDF.

GLOBAL CENTS

GCI POWERTOOLS REPORTS & VIEWS
GCI PTRV

Improve user adoption and increase visibility, and control of automated business processes by creating User Interfaces, reports, and dashboards for Content Suite and provide access to multiple data sources within Content Suite Workflow.

GCI POWERTOOLS VIEWER
GCI PTV

Fast HTML5 document viewer that reduces the cost associated with viewing and rendering hundreds of file types. It provides annotations, redactions, and performs on-the-fly PDF conversion within the Content Suite and Extended ECM platforms.

GCI POWERTOOLS CONTENT EXPORT
GCI PTCE

Extract and pre-process defined collections of documents and metadata from Content Suite for distribution to clients, regulators, and other business partners.

GCI POWERTOOLS ELECTRONIC SIGNATURES
GCI PTES

Ensure process governance and eliminate the cost and effort by extending OpenText Electronic Signature to sign more than one document in the same workflow and enable control of signature pages and watermarks.

GCI POWERTOOLS ARCHIVING
GCI PTxA

Eliminate legal liabilities and improve Content Suite performance by automatically extracting and securely archiving workflow data, attachments, and electronic signature data.
