# VTScadaLIGHT
Software for Monitoring & Control

A Free Version of Trihedral's Award Winning SCADA Software
Perfect for Small Industrial and Personal Applications Up to 50 I/O

Instantly Intuitive Development

Includes One Mobile Connection

Integrated SCADA Toolsets

Superior monitoring and control capabilities for a vast array of automation projects.

Operators, creators, developers, and even mad scientists will love the instantly intuitive nature of VTScada. The easy learning curve and minimal PC performance requirements make this SCADA software perfect for desktops or Panel PCs connected to small systems like water tanks, micro-breweries or home automation. VTScadaLIGHT costs nothing and is a Development and Runtime license with a Thin Client. We provide up to ten VTScadaLIGHT licenses to individuals or businesses. OEMs or System Integrators can contact us about pricing for additional licenses.

A sample of the over 1,000 features included in VTScadaLIGHT.
One Simple Install Includes the Following:

- An HMI built for operators.
- A built-in Historian with click-to-trend.
- Alarm management & statistics reporting.

- Intuitive application development.
- Application security accounts.
- System backup and redundancy capability.

- Version control with change history.
- Workstation/Server health monitoring.
- OPC, ODBC, SQL, and SOAP connectivity.

Included Drivers for Most Common Hardware
- Direct Drivers to Most PLCs and RTUs.
- Generic Modbus, DNP 3, and OPC Drivers.
- JSON Driver for IOT and IIOT.
- Edit Tags Using Built-in Tools or Microsoft Excel.

Mobile Access Using Any HTML5 Browser
- Built-in application server, with SSL support.
- Manage alarms and view trends in your browser.
- Full resolution or data-saving I/O list mode.
- Support for one thin client connection included.

Runs on a Typical Desktop, Laptop, or Panel PC
- Runs on Windows Vista and up.
- Historian data format sips hard drive space.
- Run multiple applications simultaneously (50 tags total).
- Support for multiple monitors and varying resolutions.

The Idea Studio – Build Applications with Ease
- Drag-and-drop elements simplify page design.
- Prebuilt alarm and reporting pages included.
- Linking tags to page elements couldn't be simpler.
- Match and align elements with ease using familiar tools.
- Edit and develop running applications without interruption.

VTScadaLIGHT Limitations

- Limit of 50 I/O – Standard VTScada can run multi-million applications.
- Alarm notifications and acknowledgment via email, SMS, and text-to-speech phone call are not available. (Alarms can be acknowledged using the thin client connection.)
- Unlike standard VTScada, VTScadaLIGHT requires a VPN for mobile access outside your network.
- VTScadaLIGHT applications cannot synchronize with standard VTScada licenses.
- If configuring an application with multiple redundant VTScadaLIGHT licenses, the application will only support one Thin Client connection.

Upgrading is Easy

- **Looking for the newest version?** Just download the latest version of VTScada and install it in your current VTScada directory. That's it. You can now load any of your applications using the latest version of the software.
- **Ten free licenses to get you started.** When you use up your ten free VTScadaLIGHT installs, just contact us and we will get you fair pricing for additional 50 I/O licenses. Easy for OEMs or Kickstarters.
